

1. What section on a task record would you use to see the most recent update made to a record?
 - i) Journal
 - ii) Timeline
 - iii) update log
 - iv) audit log
 - v) diary
 - vi) activity
2. What are examples of UI actions, relating to lists?

choose four answers?

 - a) List buttons
 - b) list context menu
 - c) list choices
 - d) list links
 - e) list control
 - f) lists overwrite
3. which feature allows you to automate business logic for a particular application or process such as approvals, task, notifications, and record Operations?
 - a) Flows
 - b) Action sequence
 - c) Flow diagrams
 - d) action sets
 - e) task flows
4. when a Flow runs an action, it generates a runtime value, which stays the same for the duration of the flow. what is the name of that runtime value?
 - a) data pill runtime value
 - b) sequence runtime value
 - c) starting runtime value
 - d) trigger runtime value
 - e) input runtime value
5. the employee on-boarding team has asked for a way for managers to order computers, monitors, business cards, and cell phones for new employees. how would you proceed to meet this requirement?
 - a) create order guide
 - b) create requested item
 - c) create record producer
 - d) create on boarding bot
6. which resource would you use to determine if a specific user could contribute to a particular knowledge base?
 - a) User criteria diagnostics

- b) Sn_kb_author role
 - c) User criteria job log
 - d) knowledge author group
 - e) KB author group
7. If a knowledge base has no access details specified. what users are able to read articles in that knowledge base?
- a) no users
 - b) itil users
 - c) users with kb_user roleproduct

- d) any user with an articles for
permalink **e) any active user**
- 8. while showing a customer their incident form, they ask to change the priority field title to display their internal terminology Pvalue. how would you do that? choose two answers?
 - a) right click on priority and select configure dictionary
 - b) right click on priority and select configure label**
 - c) right click on priority and select configure display settings
 - d) right click on priority and select configure column
- 9. what access does a user need to be able to import articles to a knowledge base?
 - a) Sn_Knowledge_import
 - b) Sn_knowledge_cont
ribute **c) can contribute**
 - d) sn_knowledge_write
 - e) can write
 - f) can import
- 10. what controls the publishing and retiring process for knowledge articles?
 - a) workflow
designer **b) workflows**
 - c) state life cycle
 - d) approval policies
 - e) approval definitions
- 11. what is an advantage of defining relationship types between ci classes?
 - a) Improves data quality, as the CIs will automatically be related when CMDB is activated.
 - b) it prevents users from relating CIs incorrectly.
 - c) it automates the loading of the ci dependency view.**
 - d) makes relating CIs easier, because predefined relationship suggests which type of CIs should be
- 12. when using the CI dependency view, how would you view the relationship between one CI and another CI?
 - a) right click, view relationship
 - b) Click on the plus to expand cluster
 - c) click down arrow, view relationship
 - d) Hover on connection line**
- 13. Of the Ci tables, which is a base table of the CMDB hierarchy?
 - a) ECMDB
 - b) Cmdb_rel_ci
 - c) Cmdb
 - d) cmdb**

- e) Ecmdb_rel_ci
 - f) Ecmdb_ci
14. what table acts as a staging area for records imported from a data source?
- a) staging table
 - b) temp table
 - c) transform table
 - d) import set row table
15. which field (or fields) is used as a unique key during imports?
- a) Sys IDs

- b) match
 - fields c)
 - coalesce fields
 - d) key fields
16. what module enables an administrator to define destinations for imported data on any ServiceNow table?
- a) field transform
 - b) schema map
 - c) import map
 - d) transform map
17. the customer wants all users to have access to the records in the offerings table. what setting on access control definition would you use to grant access to all of the offering table records?
- a) Offering. None
 - b) None. Offering
 - c) Offering. Name
 - d) Offering
18. a manager wants to review a snapshot of month end sales performance data, as compared to sales target. in addition, the manager wants to be able to see those monthly numbers trended overtime and forecasted into the future. what capability do you suggest for this manager?
- a) schedule reports, a custom snapshot table and projection report
 - b) scheduled reports, a custom snapshot table and a trend report.
 - c) performance analytics.
 - d) scheduled reports and excel
 - e) key performance indicators.
19. which component of a table contains a piece of data for one record?
- a) Field
 - b) Factor
 - c) data point
 - d) item
 - e) element
20. what do you click when you have made modifications to your report, and you want to see the results without saving?
- a) Run
 - b) Execute
 - c) Test
 - d) Preview
 - e) try it
21. The report designer contains different sections for configuring your report. which section is used to specify grouping and calculations to be run against the data?
- a) Data

- b) Format
- c) **Configure**
- d) Style
- e) group by

22. what section on the notes tab shows the history of the work documented on the record?

- a)
Journal

b)
Activity

- c) Timeline
 - d) audit log
 - e) diary
23. Your customer wants to update a notification, so it is sent to the caller and also to the manager of the caller. how would you approach this requirement?
- a) Set who will receive to subscribable
 - b) on the send to tab, add caller field, dot walk to caller's manager to add manager.
 - c) Create workflow and include a notification in the workflow
 - d) on who will receive tab, select copy manager checkbox.
 - e) on who will receive tab, add caller field, dot walk to caller's Manager to add managers.
24. An IT User calls the service desk Because they need to work on task records. all they can see his self-service on their homepage when they log into the service now instance. what issue could explain this? choose two answers?
- a) their user record was not approved by their managers
 - b) that user account does not belong to any group which contains the ITIL role.
 - c) their user account is not logged in property
 - d) their user account does not have itil role
 - e) That user account failed LDAP authentication
25. What type of rules specify which user groups are responsible to work on different types of tasks?
- a) On call
 - b) Assignment
 - c) Routing
 - d) Calendar
 - e) Escalation
26. using the module. system properties> my company. what branding options are available?
- a) banner image, banner text, colour scheme
 - b) company name, company logo
 - c) banner image, banner text
 - d) company name, company logo, colour scheme
27. From form designer, how would you define a section, so it displays as a tab?
- a) Click the gear and check the tab option
 - b) Click context menu > configure tabs
 - c) add .tab to the end of the section name
 - d) add _tap to the end of the

section name e) name the section

28. When looking at a long list of records, you want to quickly filter, to show only those which have category of cross. How might you do that?

- a) on breadcrumbs, click > icon, type hardware and click enter
- b) right click on the magnifier, type hardware and click enter
- c) click funnel icon, type hardware and click enter.
- d) on the list, locate and right click on the value Hardware, select show matching
- e) on the category column header, right click and select show > hardware.

29. groups are defined at what?

- a) An escalation pod
- b) a collection of subject matter experts
- c) a department

- d) A team of users
 - e) A correction of users
30. what is the best way to learn about performance analytics?
- a) use the ServiceNow wiki
 - b) schedule a demo with ServiceNow sales team
 - c) take a service now performance analytics course on now learning
 - d) activate the plugin on your production environment and start the default datacollectors.
31. A subject matter expert routinely receives task which have been worked by first and level support before receiving the assignment. what could you suggest, to make it easier for the expert to read only the work notes in the activity log?
- a) click contexts menu > work notes view
 - b) click funnel icon and select only work notes
 - c) click Context menu > history
 - d) click personalise icon and select activity stream
 - e) right click form header > form layout > add work note section
32. for a customer's inventory application, several inventory applications fields on a needed-on inventory ticket. this ticket will be assigned to inventory support team members. how would you start to implement this requirement?
- a) create inventory table as a new base table. then add inventory specification fields as needed.
 - b) create inventory table with the inventory specification fields. in create view between the inventory and task table.
 - c) create the inventory table with the inventory specification fields. then create many to many relationships between the inventory and the task table.
 - d) create inventory table as an extended table from the task table. then add the inventory specification fields, as needed.
33. when using the report designer, it is best practice to make copy of an existing report then make modification to your copy of that report. when viewing the report inside the designer, how would you make a copy of the report?
- a) click on the paper icon and select create new.
 - b) click on the down triangle and select insert and stay
 - c) click on the properties tab and select save as
 - d) click on context menu and select insert and stay
 - e) click on the funnel icon and create copy
34. your customer has a human resource knowledge base, which is only accessible to members of the human resource department. A new procedure regarding employee quarterly reviews needs to be published to the knowledge base but should be only visible to HR manager. how

would you meet this requirement?

- a) on the knowledge base, add user criteria with the manager can read script to the can read list, publish article to any category.
- b) on the knowledge article, add an access control for HR manager group on the canread list, then publish article to any category
- c) on the knowledge base, create an HR manager category, add user criteria for HR manager group on the categories can read list, then publish the article to that category.
- d) on the knowledge article, add user criteria for HR manager group on the can readlist, then publish article to any category

35. while testing a catalog item for ordering an expensive computer, the mandatory approval is being skipped for requester Bob Smith, but not for any of the other requests. what could explain the issue?
- a) the manager does not have a delegate assigned
 - b) there is a business rule, excluding Bob Smith with from any approvals
 - c) the Bob Smith user account, does not have a manager specified
 - d) Bob Smith is a VIP
 - e) Bob Smith does not have a delegate set up on his account
36. what module do you use to access the report that are available to you?
- a) self-service> my reports
 - b) reports> overview
 - c) report's> home page
 - d) report's> view/run
 - e) self-service> my dashboards
37. Why is it recommended that you Limit update sets to maximum of 100 records? Choose 2 answers?
- a) Comply with ISO audit requirements
 - b) smaller update sets can be imported to production during business hours
 - c) reduce potential conflicts
 - d) improve ability to troubleshoot issues with the default update set
 - e) make it easier to identify and review changes
 - f) keeps update set logs shorter
 - g) Make it easier for developers to organise their work
38. which flow components allow you to specify when a flow should be run?
- a) Trigger and condition
 - b) trigger and condition pill
 - c) condition and table
 - d) scope and trigger condition
 - e) trigger criteria and clock
39. a customer has asked for the following updates to a form: make resolution code mandatory, when state is changed to resolved, hide major incident checkbox, unless logged in user as major incident manager role. what type of rules would you use to implement this requirement?
- a) field Lipper
 - b) UI policy and actions
 - c) UI design
 - d) dictionary design
 - e) form constraint
40. what utility enables process owners to other network enterprise workflows within a single unified process?

- a) Flow editor
- b) floor designer
- c) workflow manager
- d) process owner dashboard
- e) process workflow designer
- f) process automation designer
- g) process flow manager

41. which type of script runs in the browser?

- a) flow designer actions
 - b) script includes
 - c) business rules
 - d) ACL scripts
 - e) transform maps
 - f) **UI policies and client scripts**
42. it time for end user is based on the round trip between the client and the server. What activities are included in the round trips?
- a) Submit+ query
 - b) **request+ response**
 - c) insert+ verify
 - d) save+ update
 - e) write+ read
43. What instance resource allows you to access guided tours, information about actions, and instruction on how to use inputs and outputs in your flow?
- a) **Getting started**
 - b) Wiki
 - c) help panel (question mark Icon)
 - d) Docs
 - e) user guide
 - f) community
44. here is as example of the criteria set for a knowledge base: Companies: ACME North America, department: HR, groups: ACME MANAGERS, Match all: yes. in this example, what user would have access to this knowledge base?
- a) members of the acme managers group, and HR department, regardless of geography.
 - b) Employees of the ACME North America, who are members of HR department or the ACME managers group
 - c) **members of the ACME Manager group, who are also members of HR departments and part of ACME North America**
 - d) users which are members of either ACME North America, or HR department or ACME Managers group
45. What is a set of condition applied to a table list to show as subset of the data?
- a) Mask
 - b) Divis
 - or c) **Filter**
 - d) Funnel
 - e) Query
46. what are the different ways you can create a favourite for a particular

record? Choose two answers?

- a) from the record related links, click add favourites
 - b) from the record form header, click the star icon
 - c) from the record form header, click additional action menus and select create favourite
 - d) from list, click the star icon
 - e) from list, drag record number to favourites on the navigator.
 - f) from the record form header, click paperclip icon.
47. if you have the impersonate role, what type of user are you not able to impersonate?

- a) Extended security admin
 - b) security desk users
 - c) special agents
 - d) government customers
 - e) security incident response users
48. on a list, what part of the table, does each column show?
- a) an element
 - b) a relationship
 - c) a record
 - d) a attribute
 - e) a Field
49. Which type of field allows you to enter freely using letters, numbers, and special characters?
- a) multi line text
 - b) single line text
 - c) open text
 - d) text
 - e) string
50. To quickly return to your instances home page, what item would you click?
- a) star icon
 - b) shortcuts icon
 - c) navigation header
 - d) gear icon
 - e) instance logo
 - f) user menu
51. Which admin role is required to make changes to high security setting?
- a) Ad_admin
 - b) High_sec_admin
 - c) Sn_ad_admin
 - d) Admin
 - e) Security_admin
52. with the admin role, a user would have access to all platform features, functions, and data with what exceptions?
- a) High security and human resources
 - b) human resources and security operations
 - c) employee personality identification information and security operations
 - d) human resource and enterprise CMDB
 - e) security operations and vulnerability response
53. from the my approval module, you want to quickly authorize a request. how can you do this quickly from the list view?

- a) right click on the requested state, select approve
- b) right click on the approval number, select approve
- c) select approval record by checking box, click on green check
- d) right click on the approval number, select approved, click green check

54. what attributes you can manage using system properties> basic configuration UI16? Choose five answers?

- a) default calendar
- b) default region
- c) base theme

- d) preferred browser
- e) font style
- f) banner image
- g) start-up sound
- h) browser tab title
- i) animation style
- j) user photo icon
- on/off
- k) module text colour
- l) header background colour
- m) default homepage

55. What module do you use to access the full screen view of connect?

- a) Connect> dashboard
- b) Connect> workspace
- c) Connect> connect chat
- d) Connect> tools> workspace
- e) Connect> agent workspace

56. A new employee joins the IT department and needs to perform work assigned to network and Hardware groups. how would you set up their access? Choose 3 answers?

- a) add user account to hardware group
- b) add user account to ACL
- c) add user account to itil group
- d) Create user account
- e) add user account to IT knowledge base
- f) add user account to network group

57. when would you use the following steps? i) Homepage admin > pages ii) Right click on homepage record iii) select unload portal page

- a) to add a homepage to an update set
- b) to delete homepage
- c) to publish a homepage to the portal
- d) to retire homepage

58. On a business rule, when setting determines at what points the rule executes. what are the options for specifying that timing?

- a) Prior to, synchronous, on update
- b) Insert, update, delete, query
- c) Before, synchronous, schedule

job, views d) Before, after, Async,
display

59. what is the language used for scripting in the ServiceNow?

- a) Perl
- b) Python
- c) JavaScript
- d) C++
- e) PHP
- f) Glide

60. which script can run when a record is displayed, inserted, updated, deleted or when a table is queried?

- a) client script
- b) business rule
- c) UI script

- d) scheduled job
 - e) record rule
61. what process allows user to create, categorise, review, approve and browse important information in a centralised location that is shared by the entire organization?
- a) Self-service management
 - b) Knowledge-centered management
 - c) knowledge management
 - d) business information management
 - e) information portal management
62. Which storefront is a single location for accessing prebuilt spokes, to quickly integrate with 3rd party services to build and share content?
- a) integration portal
 - b) integration store
 - c) service now spoke store
 - d) integration one stop
 - e) ServiceNow store
 - f) integration spoke hub
 - g) spoke store
63. which role can manage multiple knowledge bases?
- a) Sn_kb_admin
 - b) Kb_Admin
 - c) Knowledge_admin
 - d) Knowledge_base_admin
64. You are creating a catalog item for ordering a new desktop computer. The computer have these options: colour: black or silver, ram: 32 MB or 64 MB, keyboard: standard or economic, monitor: 24 inch or 32 inch. how would you add this option to the catalog item form?
- a) add choices
 - b) add UI options
 - c) add variables
 - d) add fields
65. A service catalog project will involve building 80 catalog items. for each of the catalog items, the following fields will be mandatory on the forms:
- a) requested for
 - b) requested by
 - c) approving manager
 - d) delivery instructions

all of the other variables will be specific to the individual catalog item. what features would you use when designing the catalog item form?

- a) create an order guide which includes all variables; then copy and hide variables as needed.
- b) create one variable set for the four variables; then add the variable set to each of the eighty catalog items
- c) create a variable set template; they apply to all of the catalog items
- d) create a record producer that contains the four fields; then add to the record producer related list on the catalog items

- e) create a floor designer action, with variable set data pill; then apply flow to all of the eighty catalog items

66. what is the best practice regarding data imports?
- a) **plan time before your import to remove obsolete or inaccurate data.**
 - b) use extremely large import sets, instead of multiple large import sets.
 - c) adjust your transform maps, after the data is loaded into the target table
 - d) create a new import set table for each new data load
 - e) monitor data quality and clean imported data using the data scrub workspace
67. which service now resource can be used as a blueprint to map your IT services to servicenow?
- a) Configuration management database (CMDB)
 - b) now learning
 - c) service now wiki
 - d) service mapping guided setup
 - e) **common service data model (CSDM)**
 - f) IT service management (ITSM)
68. What are the steps for importing data using an import set?
- a) Identify source: import transform map; run transformer; verify import
 - b) **Load the data; create transform map; transform data; clean up import table**
 - c) select source file; run auto map; transform data; clean up target table
 - d) set up LDAP; run auto map; transform data; clean up target table
69. you have been asked to create a way for users to order a new iPhone, but only if they get two levels of approval. the approvers and users should be automatically notified at each approval level. what feature would you use to manage the approvals and notification?
- a) **Flows**
 - b) approval criteria
 - c) approval chains
 - d) approval delegates
 - e) parent child approvers
70. when importing data, what happens to imported rows, if no coalesce field is specified?
- a) all rows are treated as new records, but error will be flagged in the import log
 - b) duplicate rows are rejected from the import

- c) all rows are treated as new records. no existing records were updated
 - d) all rows or rejected from the import, as coalesce field is required
71. what tool allows you to drag and drop to specify links between source fields on an importset table and destination fields on any service now table?
- a) Mapping assist utility
 - b) import workspace
 - c) data source map
 - d) import designer
 - e) transform designer
 - f) transform dashboard
72. when importing data from a spreadsheet which step defines where the incoming data columns will be written in the receiving tables?

- a) schedule transform
 - b) select data source
 - c) **field mapping -- filed matching**
 - d) load data
 - e) create transform app
73. to quickly return to a homepage you were using 5 minutes ago, which item would you click?
- a) gear icon
 - b) **clock icon**
 - c) right click history
 - d) homepage icon
 - e) history module
 - f) start icon
74. what is the most important thing to remember about activating a plugin?
- a) install dependent plugins first
 - b) tick the box for adding demo data
 - c) **plugins once installed cannot be uninstalled**
 - d) submit HI ticket to get Authorization
 - e) plugins are prohibited in personal developer instances
75. Certain tables have a prefix like HR_. which kind of tables has a name that starts with a custom prefix?
- a) excluded table
 - b) scooped application table
 - c) **system table**
 - d) explanation table
 - e) Xray search table
76. within the report library, there are many baseline reports that can be used for learning about reports. what could you search for to locate ITIL best practice indicator reports?
- a) **KPI**
 - b) ITSM
 - c) ITIL
 - d) PA
 - e) Sn_itil
77. while on an incident record, how would you add a tag for "special Handling" To the record?
- a) click on the context menu, select add tag, type special handling, press enter
 - b) on the special handling field, check the box
 - c) on the tag field, select special handling from the choice list
 - d) **click on the ... icon, click add tag, type special handling, press enter**
78. when using context menu on list, form, and column headings, what are the quick way to access the menus? choose two answers?

a) right click on the list, form, or column heading
b) click on context menu icon

- c) shift click on the list, form, or column heading
- d) double click on the list, form, or column heading.
- e) Ctrl M

79. which icon in the banner do you use to turn on the application picker and the update setpicker?

- a) Magnifier
- b) check box

- c) question
 - mark d) Gear
 - e) chat bubbles
80. A new service desk employee in Latin America Complaints that the create dates and time are incorrect on their incident list. what would you suggest to fix this issue?
- a) use the system properties to correct the instance time zone
 - b) have them correct the time zone on their computer
 - c) recommend they use Chrome instead of explorer
 - d) Have them use the gear icon to set the employees time zone
 - e) have them clear their cache
81. A department uses SLA data extensively to run reports. they keep asking for help with building reports off of the same set of tables. they seem to be conducted by dot walking. What could you do to make it easier for them to build their reports?
- a) System table flow house their reporting data
 - b) write knowledge articles explaining how to do dot walking
 - c) create a data source for them and show them how to use it
 - d) send a team member to a reporting class knock out any untrained users
 - e) show them how to export to excel format
82. what are examples of core tables in the ServiceNow platform?
- a) Team, party, awards
 - b) User, task, incident
 - c) Work, caller, timecard
 - d) base configuration item, configuration item, base task
83. What are benefits of assigning work tasks to a group, rather than to an individual? choose five answers?
- a) group members can avoid task which are nearing SLA breach
 - b) group members can pick task based on the SLA urgency
 - c) Site support members can pick task based on location
 - d) groups can assign task to users based on on-call schedules
 - e) group can assign task to users based on skills
 - f) groups can assign task to user based on availability
 - g) group members can pick task, based on highest priority
 - h) group members can choose their preferred task from my groups works
84. what sections on the CI form, can you find information about the other CIs associated with your CI?
- a) related list
 - b) related items
 - c) affected CI tab

- d) related links
 - e) child CI tab
85. A manager wants to run a report showing how many service requests have been fulfilled for business cards since the beginning of the year. what table would they select for building this report?
- a) Request[sc_req]
 - b) requested item[sc_req_item]
 - c) task[task]
 - d) catalog item[sc_cat_item]
 - e) catalog task[sc_task]

- f) service catalog[sc_catalog]
86. your customer requires that they be able to monitor which users are performing impersonation in their instance. what would you do to meet that requirement?
- a) add the role log write[sn_Log_write] to the impersonator group
 - b) activate the glide.sys.log_impersonation script
 - c) create user update set for impersonation tracking
 - d) on the impersonator role record, right click and select create log
 - e) from the user icon, select elevate roles
87. sections on a form can appear as: one or two columns, tabs. From form designer, how do you define a section, so it displays as a tab?
- a) name the section
 - b) add_tab to the end of the section name
 - c) add. tab to the end of the section name
 - d) click context menu> configure tabs
 - e) click the gear and check the tab option
88. a manager is complaining that they can't get the data then they need on a report, because the data resides in two different tables. this data is used for many different reports in their department. you have checked to see if dot walking will meet the requirement and it is not possible. what else might you try to help this manager?
- a) create a database view
 - b) create a report source
 - c) create a custom table
 - d) export the tables to spreadsheet
 - e) create a report template
89. tables can be characterised in multiple ways. which of this combination is impossible? choose 2 answers?
- a) custom and core
 - b) customer and child
 - c) base and parent
 - d) custom and parent
 - e) core and base
 - f) child and core
 - g) custom and base
 - h) parent and child
90. What are advantages of using flow designer? choose three answers?
- a) supports legacy workflows
 - b) less manual scripting
 - c) enables complicated

scripting d) reduces
technical debt

- e) supports advanced developers
- f) compliments the integration store
- g) smooth integration with 3rd party systems

91. what policies are applied to all data entered into the platform via form (UI), import sets or web services?

- a) data submission policies
- b) data quality policies
- c) data integrity policies
- d) data policies

- e) write policies
92. You have been asked to configure form so an Employee could order a tablet and select the standard accessory options to purchase with it. these Standard options are carrying case, screen cleaner, tablet stand, and screen protector. what approach would you take? choose three answers?
- a) on shopping cart configuration, select options to show the add accessories button
 - b) create one catalog item for each: tablet, carrying case, screen cleaner, tablet stand, and screen protector
 - c) create catalog item for the tablet and add a variable set to the form for the accessory options
 - d) Create a record producer and on the form, add a checkbox variable for each accessory options.
 - e) create catalog item for the tablet, and on the form, add a checkbox variable for each accessory option
93. when moving a homepage or dashboard between instances, what must you remember?
- a) they are automatically added to the updates set
 - b) create a separate update set for them
 - c) they can be moved using zip files
 - d) they cannot be moved via XML
 - e) manually add them to the update set
 - f) they cannot be moved via updates set
94. when be set up with many to many relationships. what is a classic example of a scenario where the tables could have many to many relationships?
- a) A task can trigger many workflows and workflow can trigger many tasks
 - b) vendors can sell multiple products and products can be sold by multiple vendors
 - c) request can contain many items and items can be any item from the catalogs
 - d) a configuration item can belong to multiple classes and classes can contain multiple configuration items
95. Your customer wants to add the company's email banner to each customer Facing email notification. how would you approach this requirement?
- a) create a company HTTP email wrapper
 - b) create a company email template
 - c) create a company CSS package for emails
 - d) create a company email header and footer
96. what catalog tool would you use to create a catalog item or record producer?
- a) catalog formatter

- b) catalog flow builder
- c) catalog builder
- d) catalog designer
- e) variable designer
- f) form designer
- g) workflow designer

97. On a form header, what icon would you Click to access template features?

- a) paper clip
- b) stamp
- c) context menu
- d) more options (...)

98. Which tab on the knowledge base record, would you use to identify the set of users who are able to read articles in that knowledge base?
- can read
 - access list
 - accessible to
 - can access
99. when adding a related list to a form, you choose the related list from the list collector. what is an example of a related list you might see on the list collector? choose 3 answers?
- Outages > Task number
 - catalog task > parent
 - HR case > parent
 - Problem == parent
 - release phase == parent
100. in flow designer, where is the data from an action stored so it can be used in subsequent actions in the flow?
- Data pill
 - data trigger
 - data element
 - field icon
 - field value
101. Which module would you use to create a new automation of business logic such as approvals, task and notifications?
- Process Automation > active flows
 - process automation > flow administration
 - process automation > process flow
 - process automation > workflow editor
 - process automation > flow designer
102. what are the different types of data sources, which may be imported into servicenow? Choose 4 answers?
- implementation spoke
 - JDBC connection
 - DataHub
 - network server
 - LDAP connection
 - local sources (i.e., XML, CSV, excel)
103. What are the examples of UI actions relating to forms? Choose three answers?
- form context menu

- b) form
- columns c)
- form links
- d) form buttons
- e) form View

104. Which icon would you double Click to expand and collapse the list of all applications and modules?

- a) Funnel
- b) Clock
- c) Application
- d) Star

105. on what part of the service now instance, would you find the option to impersonate user?
- a) content frame
 - b) module
 - c) application navigator
 - d) banner
106. what are the main components of the form design interface? Choose 3 answers?
- a) field picker
 - b) field layout
 - c) form layout
 - d) page header
 - e) field navigator
107. what features are available in knowledge management to support continuous improvement on the knowledge articles? Choose 4 answers?
- a) flag article
 - b) tag as helpful
 - c) submit KB Errata
 - e) Add comments
 - d) click frowning icon
 - f) rate with stars
108. when a custom table is created, which access control rules are automatically created? Choose 4 answers?
- a) Update
 - b) Execute
 - c) Create
 - d) Read
 - e) Delete
 - f) Write
109. when you set a policy that is applied to all data entered into the platform (UI, import sets, or web services). where does this policy required the Default?
- a) Network
 - b) Server
 - c) Client
 - d) Browser

110. Which tool is used to define relationship between fields in an imports Set table and a target table?
- a) schema map
 - b) transform schema
 - c) transform map
 - d) field transformer
111. How would you navigate to the schema map for a table?
- a) system definitions> tables. select table. Go to related links and click show schema map
 - b) system dictionary> show schema map. select table
 - c) system definition> dictionary. select table. go to related links and click show schemamap
 - d) system definition> show schema map. select table

112. what feature allows you to limit users able to contribute or read knowledge within a knowledge base?
- a) Roles
 - b) user criteria
 - c) categories
 - d) groups
113. What does natural language query allow you to do on a list?
- a) set list filter, using audible commands
 - b) filter list by typing in a phrase
 - c) predict the filter desired by the user
 - d) Speak to the condition builder
 - e) automatically select a filter based on keywords
114. your customer has a human resource knowledge base, which is only accessible to members of the human resource department. A new procedure regarding employee quarterly reviews needs to be published to the knowledge base but should be only visible to HR manager. how would you meet this requirement?
- a) Add user criteria for HR manager group on the can read list of the article
 - b) add user criteria for HR manager group on the categories can read list
 - c) on the knowledge article, add an access control for HR manager group on the canread list, then publish article to any category.
 - d) On the knowledge base, add user criteria with a manager can read script to the canread list, publish articles to any category
115. What type of entities can receive task assignments, in service now? choose two answers?
- a) Groups
 - b) Departments
 - c) Teams
 - d) Users
116. what capability allows user to create dashboards with big widgets to visualise data over time in order to identify areas of improvement?
- a) Reporting
 - b) scheduled reports
 - c) analytics reports
 - d) performance analytics
117. which would you follow when testing a catalogue item that has a manager approval flow? Choose three answers?

- a) make sure the latest flows are activated.
 - b) use the instance Incognito settings to quickly toggle between requester and approval
 - c) use your admin account, so you can approve the items quickly
 - d) impersonate the requester to ensure the form works
 - e) make sure the requesters user record as manager specified
 - f) Create and select your testing update set before starting the test cases.
118. when designing a flow, how do you reference data from a record, in that flow?
- a) Use the condition builder to specify the desired values
 - b) drag the data pill onto the flow definition
 - c) add the table reference using the slush bucket
 - d) specify the source table on the data pill related list

- e) drag the table icon onto the flow definition
- 119. after finishing your work on high security setting, what is a possible way to return to normal admin security levels?
 - a) Select global update set
 - b) end impersonation
 - c) use system administration> normal security module
 - d) select normal role
 - e) logout and back in
- 120. access controls are evaluated in this order: 1. Match Object against table ACL 2. Match The object against field ACL. Within step one above, what order are the table ACLs evaluated?
 - a) general to specific: table ACL, table.field ACL, parent table. field ACL
 - b) specific to general: table.field ACL, parent table.field ACL, * Field ACL
 - c) top to bottom: wildcard table ACL, parent table ACL, table ACL
 - d) bottom to top: table ACL, table. field ACL, parent table. field ACL
 - e) specific to general: table ACL, parent table ACL, wildcard(*) ACL
- 121. When selecting the target table for an import, which table can you select? choose three answers?
 - a) related tables, using dot walk
 - b) tables outside of servicenow
 - c) tables within the existing application scope
 - d) tables within the global scope
 - e) tables which allow write access to other applications
- 122. A user wants to create a set of filter conditions, where they want to show records which satisfy two conditions: 1. incidents where the state is closed, 2. incidents where assignment group is network. after clicking the funnel icon, what should the user do?
 - a) define the first condition; click AND button; define second condition; click run
 - b) define the first condition; click OR button; define second condition; press enter
 - c) define the first condition; click> icon on breadcrumb, define second condition; press enter
 - d) define the first condition; click> icon on breadcrumb, define second condition; click run
 - e) define the first condition; click AND button; define second condition; press enter
- 123. What import utility does the system use when the field names on the import set match the name of the fields on the target table?
 - a) scheme mapping

b) mapping assist tool

c) automatic mapping

d) mapping dashboard

124. Report designer contains different sections for configuring your report which section is used to adjust the look of your report, including colours, titles and legend layout?

a) Format

b) Configure

c) Layout

ut

d) Style

125. Which statement correctly describes the difference between a client script and a business rule?

- a) Client scripting executes before a record is loaded and a business rule executes after a record is loaded
 - b) a client script executes on the server and a business rule executes on the client
 - c) a client script executes before a record is loaded and a business rule executes after a record is updated
 - d) a client script executes on the client and a business rule executes on the server
126. What are the advantages of using flow designer? choose three answers?
- a) reduces technical debt
 - b) enables complicated scripting
 - c) less manual scripting
 - d) smooth integration with 3rd party system
 - e) supports advanced developers
127. What tool is used to import data from various data sources and map that data into service now tables?
- a) Update set
 - b) data pack
 - c) import set
 - d) transform set
128. How would you distinguish between a base class table and a parent class table?
- a) extended tables can be extended from parent tables or base tables; but they cannot be extended from both.
 - b) base class table is not extended from another table. parent class tables may be extended from another table
 - c) base class tables always have tables extended from them. parent tables do not have tables extended from them
 - d) extended tables are always extended from parent tables. extended tables are usually extended from base tables
129. What are three security modules often used by the System Administrator? choose three answers?
- a) system security> security
 - b) system properties> security
 - c) system security> high security settings
 - d) self-service> my access
 - e) system security> access control (ACL)

130. On a filter condition, which component is always a choice list?
- a) Operator
 - b) filter criteria
 - c) match criteria
 - d) operation
131. Many actions are included with the flow designer, what are some frequently used core-actions? choose four answers?
- a) look for update
 - b) wait for condition
 - c) create record
 - d) look up record
 - e) ask for approval
 - f) wait for match

132. For your implementation, the following tables are extended from each other. 1) Incident table is extended from task table 2) super incident table is extended from incident table. in this situation, which tables are parent, child and base tables? choose five answers?
- a) super incident table is a parent table
 - b) super incident table is a child table
 - c) task table is a child table
 - d) super incident table is a base table
 - e) task table is a parent table
 - f) incident table is a base table
 - g) task table is a base table
 - h) incident table is a parent table
 - i) incident table is a child table
133. Which is the most efficient way to move large amount of data between instances?
- a) Update sets
 - b) export to data package
 - c) export to zip
 - d) export to XML
134. Which service now utility gives a service desk agent the ability to trace from a service Having an issue, to see which CIs supporting that service have active issues?
- a) CI health dashboard
 - b) event management homepage
 - c) service dashboard
 - d) CI dependency view
135. When importing spreadsheet data into service now, what is the first step in the process?
- a) select coalesce
 - b) select import set
 - c) define data source
 - d) run data scrubber
 - e) load data
136. when managing tags, you can adjust who is able to see it. what are the visibility options? choose three answers?
- a) Everyone
 - b) groups and users

c) me

d) Admins

e) Roles and permissions

137. which modules can you use to create a new table? choose two answers?

a) tables and columns

b) dictionary

c) schema

map

d) tables

138. What service now feature allows you to include data from a secondary related table on a report?

a) outer join

b) joins

c) SQL

d) dot walking

139. which of the following are not included in an update set by default? Choose 3 Answers?
- a) Business rules
 - b) Schedules
 - c) scheduled jobs
 - d) transcript
 - e) home pages
 - f) data
140. what options can you see, when you right click on a CI, from the CI dependency viewmap? choose three answers?
- a) view affected CIs
 - b) view cases
 - c) view related tasks
 - d) view recent outages
 - e) view knowledge
141. you have heard about a new application released by service now. you want to try it out, to see if it might be useful for your company's service now implementation. what would be the best way to get hands on experience with the new application?
- a) active the application plug in, on your personal dev instance
 - b) check the latest release notes on docs.servicenow.com
 - c) search the wiki for sales demo request form
 - d) Activate the application plug in, on your company's production instance.
142. On a filter condition, there is an element, which is based on the table, the user access rights, and column on the table. what is this element called?
- a) Column
 - b) Field
 - c) data element
 - d) attribute
 - e) label
143. which module would you use to customize your instance banner image, text and colours?
- a) service portal > portals > branding
 - b) system properties > basic configuration UI16
 - c) system UI > UI pages > branding
 - d) home page admin > pages > branding
 - e) system properties > branding
144. Which service now capability provides assistance to help users

obtain information, make decisions and perform common work task via messaging interface?

a) Knowledge

chat b) virtual

agent

c) now support

d) chat box

e) agent workspace

145. service now contains over 25 different report types. what are some of the types? choose five answers?

a) Semi-

donut b)

Speedometer

c) Donut

- d) Thermometer
 - e) Pie
 - f) Horizontal Bar
 - g) Odometer
146. On the CI dependency view, what enables you to trace from an infrastructure item, like a server, to the server that dependent on that server?
- a) Transform
 - b) Relationships
 - c) automapping utility
 - d) service tracer
147. which one statement correctly describes access control rule evaluation?
- a) roles are evaluated from the general to specific, so a table rule must be active to continue.
 - b) if a row level rule and a field level rule exist, both rules must be true before an operation is allowed
 - c) rules are evaluated using roles. the role with the most permissions evaluates the rules first
 - d) if more than one rules applies to a row, the older rule is evaluated first
148. Which one of the following describe the primary operations performed against tables in the service now platform?
- a) create, read, upload, delete
 - b) capture, rate, write, develop
 - c) create, rate, update, delete
 - d) create, read, write, delete
149. what are advantages of using spokes for integration? Choose 3 answers?
- a) free spokes are available in the ServiceNow store
 - b) reduces the need for code
 - c) features scale and control mechanism
 - d) ensures discoverability and reuse
 - e) automated event management
150. when looking at a long list of records, you want to quickly filter, to show only those which have short description containing email. how might you do that?
- a) on search box, select text, type email, click enter

- b) click list magnifier to expand column search, on short description, type email, click enter
 - c) click list magnifier to expand column search, on short description, type %email, click enter
 - d) click list magnifier to expand column search, on short description, type *email, click enter
151. a task worker asks how they can monitor any updates occurring to records assigned to him, like responses from customers. what do you suggest?
- a) on my work list, select activity stream icon to show a frame with live updates
 - b) select service desk > my work dashboard
 - c) open an agent workspace tab for each record he wants to monitor
 - d) click on the eyeglass icon to expand the monitor frame
152. you have an existing customer, who is using work floors for their catalog item. Existing purchasing policies to require approval for any request that totals over \$1000.

However, management wants to change the approval threshold to \$1500.
which workflow would you update to make this change?

- a) service approval processing
 - b) purchasing process
 - flow c) service catalog request
 - d) service catalog item request
153. after you create a new table, what is the best practice regarding the navigation pane? Choose 2 answers?
- a) create application menu with the same name as the table label
 - b) set the font style on both the application menu and the module
 - c) specify which roles are able to see the module
 - d) set the filter condition on the application module
 - e) Create module with the plural of the table label
 - f) specify which roles are able to see the application menu
154. What Icon do you use to change the label on your favorite?
- a) Triangle
 - b) Star
 - c) Clock
 - k d) Pencil
155. What is the platform name for the group table?
- a) Group
 - b) Sys_user_group
 - c) Sys_group
 - d) Sys_groups
156. from a form, what would you Click to modify the order of the fields on the form? Choose 2 answers?
- a) context menu> configure> form layout
 - b) context menu> configure> form designer
 - c) right click on header> configure> form design
 - d) context menu> form> layout
 - e) right click on header> configure>UX dashboard
157. On access control definitions, what are ways you can set the permissions on a table? Choose 3 answers?
- a) Groups
 - b) Roles
 - c) script that sets the answer variable to true or false
 - d) CRUD
 - e) conditional expressions

158. What is used to determine user access to knowledge bases or a knowledge article?
- a) read access flag
 - b) privacy settings
 - c) user criteria
 - d) sn_kb_read, sn_article_read
159. What is the result of the order in which access controls are evaluated?
- a) Ensures user has access to the application, before evaluating access to a module within the application
 - b) ensures user has access to the fields in a table, before considering their access to the table

- c) Ensures user has access to a table, before evaluating access to a field in the table
 - d) ensures user can get to work as quickly as possible.
160. what is a no-code approach to control the mandatory or read only state of a formfield?
- a) Client script
 - b) UI action
 - c) UI policy
 - d) UI Rule
 - e) UI Script
161. Which module is used as the first step for importing data?
- a) Transform data
 - b) coalesce data
 - c) Load data
 - d) import data
162. Which tool graphically displays an infrastructure view for a configuration item (CI) and its relationship with the other CIs?
- a) Schema map
 - b) dependency view
 - c) dependency map
 - d) database view
163. Group records are stored in which table?
- a) Group[sys_user_group]
 - b) Group[s_sys_group]
 - c) Group[u_sys_group]
 - d) Group[sn_sys_group]
164. What is the most common role that has access to almost all platform features, Functions and data?
- a) security admin
 - b) System Administrator
 - c) Sys admin
 - d) Admin
 - e) Base admin
165. What service now features can be triggered by events, and is used to inform users about activities or updates in service now?
- a) Emails
 - b) Texts
 - c) Alert

s d)

Events

e) Notifications

166. The serviceNow platform includes which type of interfaces? Choose 3 answers?

a) black office

dashboard

b) Now

mobile apps

c) service portals

d) field service task board

e) now platform user interfaces

f) agent Control Center

167. An IT manager is responsible for the network and hardware assignment groups, each group contains 5 team members. These team members are working on many tasks, but the manager cannot see any tasks on the service desk > My Groups Work List. What could explain this?
- a) the manager is not a member of the network and hardware groups.
 - b) the assignment group manager field is empty.
 - c) the manager is not a member of the service desk group
 - d) the manager does not have the ITIL role.
168. You are showing your customer a new form that you have created for their new application. they would like to add a field to the form. where could you do that? Choose 2 answers?
- a) select fields and columns module
 - b) select field class manager module
 - c) click on context menu, select configure > form design
 - d) right click on the form header, select configure > form layout
169. A role is defined as what?
- a) A persona in a workflow
 - b) a set of user access policies
 - c) a collection of permissions
 - d) a set of access control rules
170. Which application is used primarily to load data into service now?
- a) data import configuration
 - b) system import sets
 - c) import management
 - d) import hub
171. what are the three key tables in an enterprise CMDB? Choose 3 answers?
- a) Sn_cmdb_bak
 - b) Sn_cmdb
 - c) Cmdb_rel_ci
 - d) Cmdb_bak
 - e) Cmdb_ci
 - f) Cmdb
 - g) Sn_cmdb
172. How would you define an access control, to allow a user with itil role to have permission to create incident records?

- a) Name: incident.none; operation: create; role: itil
 - b) Name: incident. *; operation: write; Permission: itil
 - c) Name: incident.none; permission: create; role: itil
 - d) Name: incident. *; Permission: write; role: itil
 - e) Name: incident.Any; operation: write; Permission: itil
173. What do you activate when you want to add applications or functionality within your development instance?
- a) Patch
 - b) app updated set
 - c) app packaged
 - d) plugin
 - e) updated pack

174. from a form, what would you Click to add additional fields to the form? Choose 2 answers?
- a) right click on header > add > field
 - c) context menu > configure > form design
 - d) context menu > configure > Form layout
 - b) context menu > form > layout
 - e) context menu > form > designer
 - f) right click on header > configure > UX dashboard
175. what resource can you use to view details of the tables and configuration items (CIs) associated with a particular use case?
- a) scenario dashboard
 - b) common service (CSDM) Product View
 - c) CMDB Use Case Modeler
 - d) CI Use Case Modeler
176. service now contains a resource which provides the following: 1) A standard and shared set of service related definition across service now products and platforms that will enable and support true service level reporting. 2) A CMDB framework across our products and platforms that will enable and support multiple configuration strategies. what resource do these statements describe?
- a) information technology infrastructure library (ITIL)
 - b) configuration management database (CMDB)
 - c) common service data model (CSDM)
 - d) information technology service management (ITSM)
177. you are asked to create an option in the service catalog, which will allow a user to click get help and describe the issue they are having. these forms should create incident records, which are automatically routed to the service desk, which method would you use?
- a) create record producer
 - b) create content item
 - c) create catalog item
 - d) create order guide
178. what type of query allows you to filter list data using normal words, instead of the condition builder?
- a) natural language query
 - b) Alexa query
 - c) auto suggest query
 - d) machine learning query
 - e) predictive intelligence query
179. what is the best practice related to using the default update set for moving customization and instances?
- a) you should not use the default update sets for moving between

instances

- b) keep default updates set to maximum of 20 records, for troubleshooting purposes.
 - c) submit default updates set to application repository
 - d) merge default update sets before moving between instances
180. What is the name of the table relationship, where two or more tables are related in a bidirectional relationship, so that the related records are visible from both tables in a related list?
- a) Database view
 - b) Extended

- c) many to many
 - d) one to many
181. What function do you use to add buttons, links, and context menu items on forms and list?
- a) UI policies
 - b) UI actions
 - c) UI settings
 - d) UI config
182. what feature do you use to specify which users are you able to access a service catalog item?
- a) Can order tab.
 - b) catalog user role
 - c) can read role
 - d) User criteria
183. Tables may have a one-to-many relationship. from the service catalog, what are examples of tables having a one-to-many relationship? Choose 3 answers?
- a) one cart can have many requests
 - b) one request can have many requested items
 - c) one approval can have many requests
 - d) one requested item can have many approvals
 - e) one requested item can have many catalog tasks
184. On a form header, what is the three-bar icon called?
- a) hamburger icon
 - b) pancake icon
 - c) cake icon
 - d) additional actions or context menu
185. a user is complaining that they are seeing a blank page, when they click create new, from your custom inventory application. you have confirmed that they can see the inventory application, and the create new module on the application navigator. what could be the cause of this issue?
- a) create new module has a broken link
 - b) user should be using Chrome instead of explorer for their browser.
 - c) user has read role, but not the write role on the inventory table
 - d) known intermittent issues with UI15
 - e) user session has timed out
186. which service now capability allows you to provide knowledge articles, via a conventional messaging interface?
- a) Virtual agent
 - b) now messenger

- c) agent assist
 - d) connect agent
187. when moving multiple update sets at one time, what might you do to facilitate the move?
- a) **Preview**
 - b) Test
 - c) Batch
 - d) Verify
188. what are the components that make up a filter condition? Choose 3 answers?

- a) Field
 - b) Column
 - c) Value
 - d) Operator
 - e) match criteria
189. When impersonating a user for testing purpose, what is the best way to return the instance, logged in with in your user account?
- a) logout and back in
 - b) turn your computer off and on again
 - c) clear browser cache
 - d) end impersonation
190. What type of field has a drop down list, from which you can pick from predefined options?
- a) drop down
 - b) option
 - c) choice
 - d) picker
191. a customer requests the following data quality measures to be added: 1. incident number should be read only on all list and forms, For all users. 2. short description field should be mandatory, on all records, across all applications, on insert. which type of policy would you use to meet this requirement?
- a) dictionary design policy
 - b) data quality policy
 - c) field criteria policy
 - d) data policy
192. User records are stored in which table?
- a) User[sys_user]
 - b) User[sn_user]
 - c) User[u_sys_user]
 - d) User[s_user]
193. Your Customer would like to create a new templates to notify users who are affected by network outage at their site. which module would you use to create a new notification?
- a) system properties > email > settings
 - b) administration > notification overview
 - c) user preferences > email > notifications
 - d) system notification > email > notifications

e) click gear > notifications > new

194. Two departments (HR onboarding and facilities) have come to you, asking for a way for employees to request event room setup services. The requirements are the same for the form and the task routing to the facilities assignment group. 1) For HR, the item will be used primarily for the onboarding condition, for employees orientation sessions. 2) for facilities, the item will be used for anyone in the company who needs room setup services. However, both departments have their own service catalogs. what do you do, to support these requirements?

- a) create one catalog item for event room setup; then use ACLs to control access.
- b) create one catalog item for HR event room setup and one for facilities even roomsetup; then publish each to the appropriate catalog

- c) create one catalog item for event room setup; then publish to the parent catalogue, which is accessible to both HR and facilities.
- d) create one catalogue item for event room setup; then publish to both catalogs.

NO.1 Which would NOT appear in the History section of the Application Navigator?

- A. Records
- B. UI Pages
- C. Lists
- D. Forms

Answer: B

NO.2 What module in the Service Catalog application does an Administrator access to begin creating a new item?

- A. Maintain Categories
- B. Maintain Items
- C. Content Items
- D. Items

Answer: B

NO.3 Which term refers to application menus and modules which you may want to access quickly and often?

- A. Breadcrumb
- B. Favorite
- C. Tag
- D. Bookmark

Answer: B

NO.4 Which term best describes something that is created, has worked performed upon it, and is eventually moved to a state of closed?

- A. report
- B. workflow
- C. event
- D. task

Answer: D

NO.5 Which of the following are a type of client scripts supported in ServiceNow? (Choose four.)

- A. onSubmit
- B. onUpdate
- C. onCellEdit
- D. onLoad

- E.onEdit
- F.onChange
- G.onSave

Answer: A C D F

NO.6 What is a formatter? Select one of the following.

- A.A formatter allows you to configure applications on your instance
- B.A formatter is a form element used to display information that is not a field in the record
- C. A formatter allows you to populate fields automatically
- D.A formatter is a set of conditions applied to a table to help find and work with data

Answer: B

NO.7 Which one of the following statements describes the contents of the ConfigurationManagement Database (CMDB)?

- A.The CMDB contains data about tangible and intangible business assets
- B.The CMDB contains the Business Rules that direct the intangible, configurable assets used by a company
- C. The CMDB archives all Service Management PaaS equipment metadata and usage statistics
- D.The CMDB contains ITIL process data pertaining to configuration items

Answer: A

NO.8 Which one of the following statements describes the purpose of a Service Catalog workflow?

- A.A Service Catalog workflow generates three basic components: item variable types, tasks, and approvals
- B.Although a Service Catalog workflow cannot send notifications, the workflow drives complex fulfillment processes
- C. A Service Catalog workflow is used to drive complex fulfillment processes and sends notifications to defined users or groups
- D.A Service Catalog workflow generates three basic components: item variable types, tasks, and notifications

Answer: C

NO.9 Which of the following statement describes the purpose of an Order Guide?

- A.Order Guides restrict the number of items in an order to only one item per request
- B.Order Guide provide a list of guidelines for Administrators on how to set up item variables
- C. Order Guide provide the ability to order multiple, related items as one request
- D.Order Guides take the user directly to the checkout without prompting for information

Answer: C

NO.10 Which type of interface enables you to display multiple performance analytics, reporting and other widgets on a single screen?

- A. Form
- B. List
- C. **Dashboard**
- D. Timeline

Answer: C

NO.11 What is a Dictionary Override?

- A. A Dictionary Override is an incoming customer update in an Update Set which applies to the same objects as a newer local customer update
- B. A Dictionary Override is the addition, modification, or removal of anything that could have an effect on IT services
- C. A Dictionary Override is a task within a workflow that requests an action before the workflow can continue
- D. **A Dictionary Override sets field properties in extended tables**

Answer: D

NO.12 Record numbers have to be manually incremented

- A. True
- B. **False**

Answer: B

NO.13 Service Now is a single-instance, multiple tenant architecture?

- A. True
- B. **False**

Answer: B

NO.14 Which of the following concepts are associated with the ServiceNow CMDB? (Choose four.)

- A. **Service Processes**
- B. User Permissions
- C. **Tables and Fields**
- D. **A Database**
- E. **The Dependency View**

Answer: A C D E

NO.15 UI Policy can make fields read-only, mandatory, or hidden.

- A. **True**
- B. False

Answer: A

NO.16 What are the two aspects to LDAP Integration?

- A. Data Population
- B. Data formatting
- C. Authorization
- D. Authentication

Answer: A D

NO.17 Buttons, form links, and context menu items are all examples of what type of functionality?

- A. Business Rule
- B. UI Action
- C. Client Script
- D. UI Policy

Answer: B

NO.18 Which one of the following statements is a recommendation from ServiceNow about UpdateSets?

- A. Avoid using the Default Update set as an Update Set for moving customizations from instance to instance
- B. Before moving customizations from instance to instance with Update Sets, ensure that both instances are different versions
- C. Use the Baseline Update Set to store the contents of items after they are changed the first time
- D. Once an Update Set is closed as "Complete", change it back to "In Progress" until it is applied to another instance

Answer: A

NO.19 What are the four knowledge workflows available in the ServiceNow base instance?

- A. Approval publish: Request approval from a manager of the knowledge base before moving the article to the publish state
- B. Instant Publish: Immediately publishes a draft article without requiring an approval
- C. Instant Retire: Immediately retires a published article without requiring an approval
- D. Retire Knowledge: Moves a knowledge article to the retired state.

Answer: A

NO.20 Which three Variable Types can be added to a Service Catalog Item?

- A. True/False, Multiple Choice, and Ordered
- B. True/False, Checkbox, and Number List
- C. Number List, Single Line Text, and Reference
- D. Multiple Choice, Select Box, and Checkbox

Answer: D

NO.21 How is the Event Log different from the Event Registry?

- A. Event Log contains generated Events, the Event Registry is a table of Event definitions
- B. Event Log is formatted in the Log style, the Event Registry displays different fields
- C. Event Log lists Events that were triggered by integrations, the Event Registry lists the Events that were triggered during the day (24-hour period)
- D. Event Log is the same as the Event Registry

Answer: A

NO.22 What are the three components of a filter condition?

- A. Table
- B. Value
- C. Field
- D. Operator

Answer: B C D

NO.23 There are ____ common types of Interfaces (Numeric Value)

6: There are six common types of interfaces

- A. Homepage: Consists of navigational elements, functional controls, and platform information.
- B. List: Display records from a data table, as well as allow you to edit the record information using the List Editor functionally.
- C. Form: Data is entered into ServiceNow through forms
- D. Dashboard: Enable you to display multiple performance analytics, reporting and other widgets on a single screen.
- E. Maps: Display ServiceNow data graphically on a Google map
- F. Timelines: Used to track tasks or projects

Answer: C

NO.24 What is the purpose of a Related List?

- A. To create a one-to-many relationship
- B. To dot-walk to a core table
- C. To present related fields
- D. To present related records

Answer: D

NO.25 For Administrators creating new Service Catalog items, what is a characteristic they should know about Service Catalog variables?

- A. Service Catalog variables can only be used in Record Producers
- B. Service Catalog variables can only be used in Order Guides
- C. Service Catalog variables cannot affect the order price
- D. Service Catalog variables are global by default

Answer: D

NO.26 Which are valid Service Now User Authentication Methods? (Choose

three.)

- A. XML feed
- B. Local database
- C. LDAP
- D. SSO
- E. FTP authentication

Answer: B C D

NO.27 Which tool is used to have conversations with logged-in users in real-time?

- A. Connect Chat
- B. Now Messenger
- C. User Presence
- D. Comments

Answer: A

NO.28 Which of the following allows a user to edit field values in a list without opening the form?

- A. Data Editor
- B. Edit Menu
- C. List Editor
- D. Form Designer

Answer: C

NO.29 In what order should filter elements be specified?

- A. Field, Operator, then Value
- B. Field, Operator, then Condition
- C. Operator, Condition, then Value
- D. Value, Operator, then Field

Answer: A

NO.30 What is a Record Producer?

- A. A Record Producer is a type of Catalog Item that is used for Requests, not Services
- B. A Record Producer creates user records
- C. A Record Producer is a type of Catalog Item that provides easy ordering by bundling requests
- D. A Record Producer is a type of a Catalog Item that allows users to create task-based records from the Service Catalog

Answer: D

NO.31 Which one of the following statements is true about Column Context Menus?

- A. It displays actions such as creating quick reports, configuring the list, and exporting

data

- B.**It displays actions related to filtering options, assigning tags, and search
- C.** It displays actions related to viewing and filtering the entire list
- D.**It displays actions such as view form, view related task, and add relationship

Answer: A

NO.32 Which of the following is true of Service Catalog Items in relation to the Service Catalog?

- A.**They run behind the scenes.
- B.****They are the building blocks.**
- C.** They are optional.
- D.**They provide options.

Answer: B

NO.33 What are the main UI component(s) of the ServiceNow Platform?

- A.**Banner Navigator
- B.****Banner Frame**
- C.** Application Frame
- D.****Application Navigator**
- E.****Content Menu**
- F.**Content Frame

Answer: B D F

NO.34 The baseline Service Catalog homepage contains links to which of the following components?

- A.****Record Producers, Order Guides, and Catalog Items**
- B.**Order Guides, Item Variables, and Workflows
- C.** Order Guides, Catalog Items, and Workflows
- D.**Record Producers, Order Guides, and Item Variables

Answer: A

NO.35 Access Control rules may be defined with which of the following permission requirements?(Choose three.)

- A.****Roles**
- B.****Conditional Expressions**
- C.** Assignment Rules
- D.****Scripts**
- E.**User Criteria
- F.**Groups

Answer: A B D

NO.36 Which are states that you can make a field on a form using UI Policy?

- A.****read-only**
- B.**write-only

- C. Necessary
- D. **Mandatory**
- E. Empty
- F. **Hidden**

Answer: A D F

NO.37 Which of the following can be customized through the Basic Configuration UI 16 module?(Choose three.)

- A. **Banner Image**
- B. Record Number Format
- C. Browser Tab Title
- D. **System Date Format**
- E. **Form Header Size**

Answer: A C D

NO.38 database live at the Data Center.

- A. **True**
- B. False

Answer: A

NO.39 _____ is a computer program running as a service; a physical computer dedicated to running one or more services, or a system running a database.

Answer: **Server**

NO.40 Which one of the following statements applies to a set of fields when they are coalesced during an import?

- A. **If a match is found using the coalesce fields, the existing record is updated with the information being imported**
- B. If a match is not found using the coalesce fields, the system does not create a Transform Map
- C. If a match is found using the coalesce fields, the system creates a new record
- D. If a match is not found using the coalesce fields, the existing record is updated with the information being imported

Answer: A

NO.41 What information does the System Dictionary contain?

- A. The human-readable labels and language settings
- B. **The definition for each table and column**
- C. The information on how tables relate to each other
- D. The language dictionary used for spell checking

Answer: B

NO.42 What is the Import Set Table?

- A. A table where data will be placed, post-transformation

- B. A table that determines relationships
- C. A staging area for imported records
- D. A repository for Update Set information

Answer: C

NO.43 What is the name of the conversational bot platform that provides assistance to help users obtain information, make decisions, and perform common tasks?

- A. Answer Agent
- B. live Feed
- C. Virtual Agent
- D. Connect Chat

Answer: C

NO.44 Reports can be created from which different places in the platform?
(Choose two.)

- A. List column heading
- B. Metrics module
- C. Statistics module
- D. View / Run module

Answer: A D

NO.45 Which one of the following statements best describes the purpose of an Update Set?

- A. An Update Set allows administrators to group a series of changes into a named set and then move this set as a unit to other systems
- B. By default, an Update Set includes customizations, Business Rules, and homepages
- C. An Update Set is a group of customizations that is moved from Production to Development
- D. By default, the changes included in an Update Set are visible only in the instance to which they are applied

Answer: A

NO.46 When using the Load Data and Transform Map process, what is the Mapping Assist used for?

- A. Mapping fields using the Import Log
- B. Mapping fields using Transform History
- C. Mapping fields using an SLA
- D. Mapping fields using a Field Map

Answer: D

NO.47 The display sequence is controlled in a Service Catalog Item using which of the following?

- A.The Default Value field in the Catalog Item form
- B.The Sequence field in the Catalog Item form
- C. The Order field in the Variable form
- D.The Choice field in the Variable form

Answer: C

NO.48 A group is stored in which table?

- A.Group[user group]
- B.Group[sys_user]
- C. Group[sys_user_group]
- D.Group[sys_user_group_profile]

Answer: C

NO.49 When working on a form, what is the difference between Insert and Update operations?

- A.Insert creates a new record and Update saves changes, both remain on the form
- B.Insert creates a new record and Update saves changes, both exit the form
- C. Insert saves changes and exits the form, Update saves changes and remains on the form
- D.Insert saves changes and remains on the form, Update saves changes and exits the form

Answer: D

NO.50 What is the purpose of flagging an article in a knowledge base?

- A.To mark an article to read later.
- B.Allow a user to submit feedback about an article
- C. Reporting an error

Answer: B

NO.51 What is the master table that contains a record for each table in the database?

- A.[sys_master_db]
- B.[sys_db_object]
- C. [sys_master_object]
- D.[sys_object_db]

Answer: B

NO.52 Which technique is used to get information from a series of referenced fields from different tables?

- A.Table-Walking
- B.Sys_ID Pulling
- C. Dot-Walking
- D.Record-Hopping

Answer: C

NO.53 Which one of these applications is available to all users?

- A. Change
- B. Incident
- C. Facilities
- D. Self-Service

Answer: D

NO.54 Tables are made up of which of the following?

- A. records
- B. lists
- C. forms.
- D. fields

Answer: A D

NO.55 A knowledge article must be which of the following states to display to a user?

- A. Published
- B. Drafted
- C. Retired
- D. Reviewed

Answer: A

NO.56 What are the 6 methods available for user authentication?

- A. Local Database: The user name and password in their user record in the instance database.
- B. Multifactor: The user name and password in the database and passcode sent to the user's mobile device that has Google Authenticator installed
- C. LDAP: The user name and password are accessed via LDAP in the corporate directory, which has a matching user account in the database.
- D. SAML 2.0: The user name and password configured in a SAML identity provider account, which has a matching user account in the database.
- E. OAuth 2.0: The user name and password of OAuth identity provider, which has a matching user account in the database.
- F. Digest Token: An encrypted digest of the user name and password in the user record.

Answer: A B C D E F

NO.57 Knowledge articles within a knowledge base are grouped by category.

- A. True
- B. False

Answer: A

NO.58 A REQ number in the Service Catalog represents...

- A. the order number.
- B. the stage.
- C. the task to complete.
- D. the individual item in the order.

Answer: A

NO.59 As it relates to ServiceNow reporting, which of the following statements describes what a metric can do?

- A. A metric is a report gauge used on homepages to display real-time data
- B. A metric is a time measurement used to report the effectiveness of workflows and SLAs
- C. A metric is used to measure and evaluate the effectiveness of IT service management processes
- D. A metric is a comparative measurement used to report the effectiveness of workflows and SLAs.

Answer: C

NO.60 Knowledge Base Search results can be sorted by which of the following? (Choose three.)

- A. Most recent update
- B. Popularity
- C. Relevancy
- D. Manager assignment
- E. Number of views

Answer: A C E

NO.61 Which of the following statements is true when a new table is created by extending another table?

- A. The new table archives the parent table and assumed its roles in the database
- B. The new table inherits all of the Business Rules, Client Scripts, and UI Policies of the parent table, but none of the existing fields
- C. The new table inherits all of the fields of the parent table and can also contain new fields unique to itself
- D. The new table inherits all of the fields, but does not inherit Access Control rules, Client Scripts, and UI Policies of the parent table

Answer: C

NO.62 What is the path an Administrator could take to view the fulfillment stage task list for an order placed by a user?

- A. RITM (Number)>REQ (Number)>PROCUREMENT (Number)
- B. REQ (Number)>RITM (Number)>PROCUREMENT (Number)

- C. REQ (Number)>RITM (Number)>TASK (Number)
- D.FULFILLMENT (Number)>RITM (Number)>TASK (Number)

Answer: C

NO.63 What refers to an application or system that accesses a remote service or another computersystem, known as a server?

- A.Server
- B.Client
- C. Script
- D.Policies

Answer: B

NO.64 Which one statement correctly describes Access Control rule evaluation?

- A.Rules are evaluated using roles. The role with the most permissions evaluates the rules first
- B.If more than one rule applies to a row, the older rule is evaluated first
- C. If a row level rule and a field level rule exist, both rules must be true before an operation is allowed
- D.Rules are evaluated from the general to the specific, so a table rule must be active to continue

Answer: C

NO.65 When searching using the App Navigator search field, what can be returned? (Choose four.)

- A.Names of Applications and Modules
- B.Names of Modules
- C. Names of Applications
- D.Favorites
- E.History Records
- F.Titles of Dashboard Gauges

Answer: A B C D

NO.66 How are Workflows moved between instances?

- A.Workflows are moved using Update Sets
- B.Workflows are moved using Transform Maps
- C. Workflows are moved using Application Sets
- D.Workflows cannot be moved between instances

Answer: A

NO.67 A Service Catalog may include which of the following components?

- A.Order Guides, Exchange Rates, Calendars
- B.Order Guides, Catalog Items, and Interceptors

- C. Catalog Items, Asset Contracts, Task Surveys
- D. Record Producers, Order Guides, and Catalog Items

Answer: D

NO.68 Which application is used to change the number format per table?

- A. Number Maintenance
- B. System Maintenance
- C. Table Maintenance
- D. Record Maintenance

Answer: A

NO.69 What is a way that you can mark a knowledge article for review?

- A. Flag article
- B. Review
- C. Bookmark
- D. On Hold

Answer: A

NO.70 What are the 5 provided Roles by ServiceNow?

- A. System Administrator: The admin role provides access to all platform features, applications, functions and data.
- B. Specialized Administrator: Specialized administrator roles manage specific functions or applications, such as Assignment Rules, Knowledge base, reports, or web services
- C. Fulfiller: Users with the ITIL role may fulfill ITIL activities associated with the ITIL workflow, including Incident and Change management.
- D. Approver: Users with the Approver user role can perform all requester actions and may view or modify approval records directed to the approver
- E. Requester: Also known as Employee Self Service (ESS) users, these users have no roles but can submit and manage their own requests, access public pages, etc.

Answer: A B C D E

NO.71 UI Action can prompt that an Incident has been successfully submitted.

- A. True
- B. False

Answer: A

NO.72 What defines conditions that are evaluated against users to determine which users can create, read, write, and retire knowledge articles.

- A. User conditions
- B. User info
- C. User Criteria

D.User permissions

Answer: C

NO.73 What is a schema map?

A.A schema map enables administrators to define records from specific tables as trouble sources for Configuration Items

B.A schema map graphically organizes the visual task boards for the CMDB

C. A schema map graphically displays the Configuration Items that support a business service

D.A schema map displays the details of tables and their relationships in a visual manner, allowing administrators to view and easily access different parts of the database schema

Answer: D

NO.74 What is the function of user impersonation?

A.Testing and visibility

B.Activate verbose logging

C. View custom perspectives

D.Unlock Application master list

Answer: A

NO.75 What is the platform name for the User table?

A.u_users

B.sys_users

C. x_users

D.sys_user

Answer: D

NO.76 A User is stored in which table?

A.User [sys_user]

B.User [sys_user_group]

C. User [syst_user_profile]

D.User [user_profile]

Answer: A

NO.77 What is the difference between UI Policy and UI Action?

A.UI Action can make fields read-only, mandatory, or hidden. while UI Policy can make a save button visible for appropriate users.

B.UI Policy can make fields read-only, mandatory, or hidden. while UI Action can make a save button visible for appropriate users.

Answer: B

NO.78 Where can Admins check which release is running on an ServiceNow

instance?

- A. Memory Stats module
- B. Stats module
- C. System.upgraded table
- D. Transactions log

Answer: B

NO.79 Which group of permissions is used to control Application and Module access?

- A. Access Control Rules
- B. UI Policies
- C. Roles
- D. Assignment Rules

Answer: C

NO.80 What is generated from the Service Catalog once a user places an order for an item or service?

- A. A change request
- B. An Order Guide
- C. A request
- D. An SLA

Answer: C

NO.81 Which type of tables may be extended by other tables, but do not extend another table?

- A. Base Tables
- B. Core Tables
- C. Extended Tables
- D. Custom Tables

Answer: A

NO.82 Service Now uses what term to describe all the data saved within a particular form?

- A. Fields
- B. Form
- C. Record
- D. Lists

Answer: C

NO.83 Where would you go in ServiceNow to order services and products offered by various departments?

- A. Service Catalog
- B. Self Service

- C. Service Department
- D. Customer Service

Answer: A

NO.84 Table Access Control rules are processed in the following order:

- A. any table name (wildcard), parent table name, table name
- B. table name, parent table name, any table name (wildcard)
- C. parent table name, table name, any table name (wildcard)
- D. any table name (wildcard), table name, parent table name

Answer: B

NO.85 Configuration will not affect what others see on their forms.

- A. True
- B. False

Answer: B

NO.86 Data Policy can enforce mandatory data on import.

- A. True
- B. False

Answer: A

NO.87 What displays a set of records from a table?

- A. View
- B. Dashboard
- C. Panel
- D. List

Answer: D

NO.88 A role is recorded in which table?

- A. Role[sys_user]
- B. Role[sys_user_profile]
- C. Role[sys_user_record]
- D. Role[sys_user_role]

Answer: D

NO.89 Which of the following is used to initiate a flow?

- A. A Trigger
- B. Core Action
- C. A spoke
- D. An Event

Answer: A

NO.90 What are the two pathways to view feedback left on a published article?

- A. Knowledge > articles > My Flagged
- B. Knowledge base > my knowledge > flagged articles
- C. Knowledge > My articles > Flagged
- D. Knowledge > articles > published

Answer: A D

NO.91 Create Incident, Password Reset, and Report outage: what do these services in the ServiceCatalog have in common?

- A. They direct the user to a record producer
- B. They direct the user to a catalog property
- C. They direct the user to a catalog UI policy
- D. They direct the user to a catalog client script

Answer: A

NO.92 From the User menu, which actions can a user select? (Choose three.)

- A. Send Notifications
- B. Log Out ServiceNow
- C. Elevate Roles
- D. Impersonate Users
- E. Order from Service Catalog
- F. Approve Records

Answer: B C D

NO.93 Business Rules are used to enforce mandatory data on a form.

- A. True
- B. False

Answer: B

NO.94 What is a characteristic of importing data into ServiceNow?

- A. An existing Transform Map can be used one time on the same import set
- B. Coalesce fields are used only after running Transform
- C. Any user can manage and set up import sets
- D. An existing Transform Map can be used multiple times on the same import set

Answer: D

NO.95 Each knowledge bases can have unique lifecycle workflows, user criteria, category structures, and management assignments.

- A. True
- B. False

Answer: A

NO.96 Which statement is true about business rules?

- A. A business rule must run before a database action occurs

B. A business rule can be a piece of Javascript

C. A business rule must not run before a database action occurs

D. A business rule monitors fields on a form

Answer: B

1. What is true about workflow?

Ans: Workflow can be edited only after checkout.

2. If prefix of Incident needs to be changed, which table should I refer?

Ans: Number Maintenance table [sys_number].

3. What is client transaction log?

Ans. The Client Transaction Timings feature enhances the system logs by providing more information on the durations of transactions between the client and the server.

4. Out of the below listed applications which will not run natively on smartphones?

a) Workflow

b) User Administration

c) self-service

d) Service catalog

5. Select one of the following which contains text search options

a) Knowledge

b) Lists

c) Application Navigator/Left Navigation

d) Homepage

e) All the above

6. Which is the search engine for serviceNow?

a) AnswerNow

b) GoogleNow

c) Zing

d) Search

7. In service catalog, either a request or a request item can have workflow, but not both

a) true

b) false

8. What is event registry ?

Ans: It contains all event definitions

9. What path the administrator should follow to check the fulfillment task of a request

Ans: Request Number > Requested item number > Catalog task number

10. What is the difference between event log and event registry?

Ans: Event log contains all the event records and event registry contains all the definitions of an event.

11. Can a user delete live feed post?

Ans: No he cannot. He can delete only his post not others.

12. Reports can be made from the following.

Select any two:

Ans: a)Matrix Module

b)Statistics Module

c)Context menu

d)View/Run Module

13.Match the following with appropriate user:

1)Perform catalog item assigned task and closure process

2)Manage ,views and modify requests

3)Can request for item,View own request items

14)Assign Role,Manage incidents,Problems and change

a)ITIL/fulfiller

b)System administrator

c)Approver

d)ESS user/End User

Ans:1 – c

2 – a

3 – d

4 – b

15)What is the recommendation from service now for update set:

Ans:Do not use Default update set

16) All the applications of service which runs in browser will run in mobile.

Ans:a)True

b)Flase

17. Changes made to gear will be applied to all the users.

Ans:a)True

b)False

18.Mapping assist is used for

Ans: Automatically mapping using filed map

19.What is true about roles

Ans: It is one of the record in sys_user_role table

20. Which among the following can a UI policy accomplish?

Ans: Making a field read-only

21. What steps will u take to load data from spreadsheet?

Ans - load data, create transform map, transform

22. What does CMDB consists of?

Ans: Tangible and intangible business assets.

23. ACL is applied on -

a. user

b. groups

c. applications/modules

d. table and field in table

24. Which of the following are available in Service Catalog:-

Ans: Record Producer, Catalog Variables, Order Guides

25. What does a transform map do?

Ans: A transform map is a set of field maps that determine the relationships between

fields in an import set and fields in an existing Service Now table (such as Incidents or Users).

26. Which of the following gets automatically captured in an update set:-

- a. Table, schedules, forms
- b. Table, forms, data
- d. Tables, forms, views

27. Give example of a one to many relationships

Ans: sys_user table referring to the assigned_to field in Task table

28. Global Search option can be found in which part of UI?

Ans : On Banner

29. What all are there in UI14 instance?

Ans: Banner, Edge, Content pane and Application Navigator

30. What is true about SLA-Retroactive start?

Ans: If you select the **Retroactive start** check box, the **Set start to** field appears, offering options for starting the SLA from various events on the table selected.

31. Shortcut to approve a Service Request?

Ans: Go to service request list and Right click on the request number and approve.

32. what is record producer?

Ans: A record producer is a specific type of catalog item that allows end users to create task-based records.

33. How can you define a user in serviceNow

Ans: It is a record in sys_user table

34. How many working SLAs can be attached to an Incident?

Ans: a) More than 3

b) 1

c) Infinite

d) Less than 10

35. ACL evaluates on below....

Ans: condition/script and roles

36. What does Order guide refer to in Service Catalog?

Ans: Bundled Request (An order guide gives customers an easy way to order multiple related items as a single

Where can you view information about system activity? system logs

If the system is going to be upgraded, what will be exempt from the upgrade?

Any record that has been altered from the base state
by the customer

How do you limit file attachments?

Security > System Security

SLAs include actions that can be triggered when during the lifecycle?

Anytime

What is a tool that will autopopulate the CMDB about your windows computer?

Help the helpdesk

What is A BSM Map? Business Service Management BSM map graphically displays the configuration items, CI, that support a business service.

How are users related to roles or groups? 1 to Many Relation

Where do you go in ServiceNow to change the banner and colors? System Properties, then CSS Properties

What is the sequencing of publishing a Knowledge Article? Draft Review Publish
service catalog workflow can be attached in 3 ways:

manually on the catalog item form

automatically based on conditions

automatically if no other workflows attached

How KB are organized? –By Topics and Categories

KB articles are referred in which modules below (Service Catalog, News, INC)? Ans: News

Role assignment. Ans: Inherits to group members

if User customizes the Homepage, what happens? Ans: A prefix My is added to the homepage.

38. What is there stored in CMDB? Ans: Measurable tangible and intangible data of a CI.

How ACL will execute? Ans: generic to specific

What is the true if we delete the system table?

Ans: Automatically recreated deleted System table in Next Upgrade

When High Security plugin is activated? Ans: Penetration testing

Out of the below listed applications which will not run natively on smartphones?

a) Workflow

b) User Administration

c) self-service

d) Service catalog

.Select one of the following which contains text search options

a) Knowledge

b) Lists

c) Application Navigator/Left Navigation

d) Homepage

e) All the above

Which is the search engine for serviceNow?

a)AnswerNow

b)GoogleNow

c)Zing

d)Search

Reports can be made from the following.

Select any two:

Ans: a)Matrix Module

b)Statistics Module

c)Context menu

d)View/Run Module

What is the recommendation from service now for update set:

Ans:Do not use Default update set

All the applications of service which runs in browser will run in mobile.

Ans:a)True

b)Flase

Changes made to gear will be applied to all the users.

Ans:a)True

b)False

How many working SLAs can be attached to an Incident?

Ans:a)More than 3

b)1

c)Infinite

d)Less than 10

What is the important factor to remember when a user is creating catalog variable?

Ans: Catalog Variables are global by default.

Which of the following is possible via an inbound action?

A. schedule a job

B. sends an email notification

C. modifying existing records

Which setting allows the user to view knowledge articles without logging in?

a. ESS Role b. Public Setting c. View All Setting d. View all Role

ESS can access-

Ans. My Items, My requests, KB

Data Dictionary is used for?

Ans. Database Structure

Workflow editor and Service catalog differs in approval methodology?

Ans. True

Data inconsistency correction is done from automated?

Ans.

- I. Plugin
- II. Configurations
- III. Workflow
- IV. None of these

Gauge is added to homepage

Knowledge process consists of – document creation, approval and review from SMEs and publishing

What is one thing in workflows peculiar for catalog?

ans - You can define visibility of variables on task form through workflow when it is created

What is the one pause condition for incident SLA?

ans - awaiting <something>

Which of the following is true:-

- a. When moved from left to right slush bucket, ref fields become bold
- b. System tables cannot be deleted
- c. Deleted system tables will be created again during an instance upgrade

How do you confirm an instance upgrade?

Ans: System Logs->events->system.upgraded, use this event to trigger the System Upgraded notification

If the system administrator wants to modify the homepage, which of the following links on the page indicates that this can be done

- a. Add Context
- b. Change Layout
- c. Make Gauge

How do you change the color of the instance?

Ans: Using Navigation Menu under Content Management.

do you know which release version of Service Now you are working on?

Ans: Go to System Diagnostics->Stats and check the Build name.

Which of the following is true regarding roles?

Ans: Roles can contain other roles. When user is assigned to a role, he will inherit the contained roles as well.

Which of the following defines a condition?

Ans: Field, Operator, Value

4. Where BSM maps are stored? On which table?

- ➔ **bsm_map2 table (Business Service Management map)**
- ➔ Workflow [**wf_workflow**] - The master records of workflows.
- ➔ Workflow [**wf_workflow_version**] - Particular versions of a workflow, either published versions or versions that have been checked out.
- ➔ Workflow Context [**wf_workflow_context**] - Individual instances of a workflow being used.

Which field should be there in table that identifies that it should be captured in Update Sets?

Ans: **update_synch** attribute

What does workflow timelines represent?

Ans: **Shows timestamps in graphical form for activities of workflow.**

If a user is not given filter_global or filter_admin role, what will be the impact?

Ans: **He can save the custom filter for himself only, neither for his group nor globally.**

Scenario when an Interceptor can be used?

Ans: **In change management case to provide different option for user in case of separate view and template**

Book mark feature can be found in which UI version?

Ans: **UI 11 (June 11 release)**

Data Dictionary is used for?-

Ans: **Database Structure**

How to change Homepage Color?

Ans: **CMS (Content Management System)**

How can you view reports on homepage?

Ans: **Add to Homepage**

Where are customizations stored?

Ans: **sys_update_xml [Customer Update] table**

How to set display value for any field.

Ans: **By using dictionary**

After save on form. Which fields get stored in activities log.?

Ans: **Audited fields**

In which place admin can edit the HomePgae?

Ans: **(Add Content)**

How to see the current version of instance as an Admin?

Ans: **(System Diagnostic application >> Stats Module >> Build)**

What all are available in a knowledge homepage?

General, application, policies, email, news

When Business rules can be used in Knowledge base?

Scenario based: **To insert Knowledge Article or Knowledge Submission through Incident, problem or change as record is closed in these mgmt.**

Content of banner in S-Now. –

Ans: **Global Search, Impersonation Icon, Update Set, Print, Logout, Home, Debug, Wiki help**

Where Pause condition in SLA can be used ?

☐ **it can be put on any desired field (t)**

☐ **When putting Pending State**

☐ When putting Resolved State

☐ when putting

Can we delete all tables?

☐ Yes we can format them

☐ No we can't delete any table

☐ Only fields can be deleted

☐ Only **user tables can be deleted .System tables can't be deleted (t)**

_____ is used for exchanging structured information in the implementation of Web Services in computer networks.

☐ PaaS (Platform as a Service)

☐ SaaS(Software as a Service)

☐ **SOAP (t)**

☐ All of the above

1. To change the prefix of a Ticket Number which module of Service Now is used ?

☐ System Properties

☐ UI Macro

☐ **Number Maintenance table (t)**

☐ through Scrip

2.When you click on create an incident, reset an password, report an outage, where does it take you?

☐ Catalog property

☐ Service Requests

☐ Order Guides

☐ **Record Producers (t)**

3.How to decide which application will be visible on logging?

☐ Defined through Manager Permissions

☐ Everybody can see all the applications

☐ UI Policy

☐ **Defined on the basis of roles assigned to the user.**

4. In which part of UI global search appears?

☐ Content frame

☐ Application Navigation

☐ Homepage

☐ **Banner Frame (t)**

5.What is single sign on?

- ☐ It is related to the entries entered in record producers
- ☐ this is used for checking out the workflow
- ☐ **Through this by logging in once in an instance you have the rights or the access authentication of all the softwares and web applications (t)**
- ☐ It is used for sending email to every user

6. What is there stored in CMDB?

- ☐ Measurable tangible and intangible data of a Business Service & CI.
- ☐ **Measurable tangible and intangible data of a CI. (t)**
- ☐ Measurable tangible and intangible data of a table & CI.
- ☐ Measurable tangible and intangible data of a Record Producer & CI.

7. Purpose of workflow ?

- ☐ Workflow is a set of complex CI configuration and scripts used for creating a BSM
- ☐ **workflow generates a sequence of activities, such as generating records or running scripts, and notifications (t)**
- ☐ Workflow is just used for delivery plan in Service Catalog
- ☐ Workflow is used only for approvals & notifications

8. For which of the options, changes are captured in Update Set?

- ☐ Data Record
- ☐ Configuration Items
- ☐ **Table (t)**
- ☐ New User/Group

9. _____ is used for exchanging structured information in the implementation of Web Services in computer networks.

- ☐ PaaS (Platform as a Service)
- ☐ SaaS(Software as a Service)
- ☐ **SOAP (t)**
- ☐ All of the above

10. _____ User can see tickets, messages and mails of other user.

- ☐ ESS
- ☐ Manager
- ☐ Analyst
- ☐ **Delegate (t)**

11. What does Key Icon on banner indicate in Service Now ?

- ☐ On clicking it we can see reports
- ☐ **On clicking it we can see the profile of any other user for testing (t)**
- ☐ On clicking it we can set security rights
- ☐ On clicking it we lock the page

12. What is the Use of Transform Map in update set ?

- ☐ Transform Map is used to show relation b/w extended tables in Service Now
- ☐ **It determines how data is mapped onto a ServiceNow table by specifying the destination table (t)**
- ☐ It is used to create set of complex activities performed together in Service Now
- ☐ It is used in moving all the customization to other instance without specifying any destination source.

13. Which of the following option is an example of UI Policy ?

- ☐ Increasing width of field
- ☐ Creating a new field on form
- ☐ **To make priority field mandatory (t)**
- ☐ None of these

14. For which tables all SLA's are tracked ?

- ☐ cmdb_ci
- ☐ task
- ☐ **task_sla (t)**
- ☐ none of these

15. What is the use of BSM (Business Service Management) in Service Now ?

- ☐ **A Business Service Management (BSM) map graphically displays the configuration items (CI) that support a business service and indicates the status of those configuration items (t)**
- ☐ A Business Service Management (BSM) map graphically displays the Catalog Items that support a business service and indicates the status of those Catalog items in a request.
- ☐ It displays the graphical representation of a project management work task.
- ☐ It is used for calculating the expense line in Financial management module of Service Now

16. Impersonate User means ____?

- ☐ Impersonate User has rights to see reports
- ☐ Impersonate User provide roles to other users.
- ☐ **Impersonate User can shift to any other user for testing. (t)**
- ☐ None of these

17. To improve the System Performance which among this is preferred ?

- ☐ Increase the number of gauges
- ☐ Decrease Refresh time of the page.
- ☐ **Either put refresh as off or increase time of refreshing a page (t)**

18. What is retroactive start in SLA?

- ☐ Through this field we can stop SLA on any condition

☐ **It is used for attaching SLA from a particular created date & time without attaching SLA on the opened time. (t)**

☐ **This is used for calculating duration of SLA**

☐ This field is not there on SLA Definition page.

19. Which of the following thing is true while solving incidents as per ITIL framework ?

☐ Incident Urgency is based on Impact & Priority

☐ Incident Impact is calculated on the basis of Urgency & Priority

☐ Incident Priority is filled by the user

☐ **Incident Priority is calculated on the basis of Impact & Urgency. (t)**

20. What do incident, problem and change have in common?

They save to the task table

21. When you open a service catalog and click the Order button what gets created?

REQ>RITM>TASK

22. service catalog workflow can be attached in 3 ways:

manually on the catalog item form

automatically based on conditions

automatically if no other workflows attached

23. What is a security rule at the row and column level that is executed when attempting to access a ServiceNow table?

ACL-Access Control List

24. Global Search option can be found in which part of UI?

☐ ☐ Ans: **On Banner**

25. How will you define a Service catalog workflow?

☐ ☐ Ans: **Define Workflow properties, Define Workflow activities, Publish it.**

26. Delegate User

☐ ☐ Ans: **Request on behalf**

27. Content of service catalog

☐ ☐ **Catalog Items, Record Producers, Order Guides**

28. How KB are organized?

By Topics and Categories

29. ACL applies on?-

Ans: **Fields and tables**

30. SLA, OLA and UC are configured in which module?

Ans: **Service Level Management**

31. Which is parent table for INC, CHG, PRB?

Ans: **task**

32.

KB articles are referred in which modules below (Service Catalog, News, INC)?

Ans: **News**

33. How do you modify the field behavior?

Ans: **Right click > Personalize > Dictionary**

34.. Role assignment.

Ans: **Inherits to group members**

35. Icon of reference?

Select image

36. home icon

37.

If User customizes the Homepage, what happens?

Ans: **A prefix My is added to the homepage.**

38.

38. What is there stored in CMDB?

Ans: **Measurable tangible and intangible data of a CI.**

39. Order the typical no of users for any SNOW instance:

Ans: **ESS, ITIL, Delegate Admin and Admin**

40. Catalog request flow:

Ans: **Item Requests, RITM, Fulfillment, Procurement**

41.

What is sys_id?

Ans: **Unique Record Identifier (32-Character**

42.

How to make an UI Policy global?

Ans: **By Check the Global field**

43. ACL applies to?

Ans: **Table or Field**

44. How ACL will execute?

Ans: **generic to specific**

45.

What is listing in HomePage icon?

Ans: (List of home pages)

46.

What is the use of an Update Set?

Ans: (To moving customization from one instance to other instance)

47.

When UI Actions appears on the form?

Ans: **when conditions gets satisfied**

48.

What is the true about SluchBucket?

☐ Ans: **Fields appearing in Selected section will be present in form**

49.

What is the true if we delete the system table?

☐ ☐ Ans: **Automatically recreated deleted System table in Next Upgrade**

50. If a role has assign multiple roles then which option is true

Ans: Role based

51.

When High Security plugin is activated?

Ans: **Penetration testing.**

1. Incident, problem tables inherit which table.

Ans: **Task table.**

2. Give example of a one to many relationships

Ans: **sys_user table referring to the assigned_to field in Task table**

3. When you customize a homepage, SNC makes a copy of it and _____

Ans: **adds the prefix "My" to the homepage name.**

4. Which of the following is true?

Ans: **When a user belongs to more than one group, each group provides him permissions.**

5. _____ receives notification, meeting invites on behalf of another user.

Ans: **Delegate**

6. What is SSO?

Ans: **Single- Sign-On**

7. How do you edit/ create a workflow?

Ans: **Graphical Workflow Editor**

8. What is the purpose of a service catalog workflow?

Ans: **to create workflows to drive request fulfillment. Workflows can generate and assign approvals, generate and assign tasks, or run scripts and sub flows.**

9. What is the important factor to remember when a user is creating catalog variable?

Ans: Catalog Variables are global by default.

10. What is the purpose of an update set?

Ans: An update set is a group of customizations that can be moved from one instance to another.

11. How can you change the number prefix from "INC" to "IN" for incident table?

Ans: using Number Maintenance

12. Which of the following is possible via an inbound action?

A. schedule a job

B. sends an email notification

C. modifying existing records

13. Which setting allows the user to view knowledge articles without logging in?

a. ESS Role b. Public Setting c. View All Setting d. View all Role

14. Which of the following defines a condition?

Ans: Field, Operator, Value

15. Which of the following is true regarding roles?

Ans: Roles can contain other roles. When user is assigned to a role, he will inherit the contained roles as well.

16. ACL is part of which security?

a. Physical Security b. Contextual Security c. Compliance Security

17. Which is true regarding Knowledge Base?

Ans: In a Knowledge base, articles are grouped according to categories.

18. How can you view the dictionary for a field?

Ans: Right clicks on the field and click Personalize Dictionary.

19. Which among the following is true regarding ACLs?

Ans: If there are row and field ACLs, user has to satisfy both to have access to the field.

20. What is Data Dictionary?

Ans: It contains information about a field's data type, character limit, default value, dependency, and other attributes.

21. How do you know which release version of Service Now you are working on?

Ans: Go to System Diagnostics->Stats and check the Build name.

22. How do you change the color of the instance?

Ans: Using Navigation Menu under Content Management.

23. What does this icon do? (Provided impersonate key symbol)

24. What does this icon do? (Provided the home symbol in the banner)

25. Which of the following is data saved to?

a. Table b. Form c. List

26. When user creates a table "abc", how does service now name it?

Ans: u_abc

27. Which among the following is true regarding tables?

Ans: You can delete the tables starting with "u_" permanently.

28. Which of the following influences homepage performance

Ans: Set refresh time as a long one or set it "off".

29. If the system administrator wants to modify the homepage, which of the following links on the page indicates that this can be done

a. Add Context b. **Change Layout** c. Make Gauge

30. What does the order field in service catalog do?

Ans: **It displays the catalog item in the ascending order of this value.**

31. Which of the following gets automatically captured in an update set:-

- a. Table, schedules, forms
- b. **Table, forms, data**
- c. Table, forms, homepages
- d. Tables, forms, views

32. What does the "coalesce" field do?

Ans: **Coalescing on a field (or set of fields) means the field will be used as a unique key.**

33. What details does a knowledge article hold?

34. What does a transform map do?

Ans: **A transform map is a set of field maps that determine the relationships between fields in an import set and fields in an existing Service Now table (such as Incidents or Users).**

35. How is the application Navigator (left nav) populated on load

Ans: **It is populated based on the role of the logged in user.**

36. Difference between client script and business rule

Ans: **Client script runs at client side onLoad, onChange and onSubmit of the form, BR runs at server side before/after record is inserted, updated or deleted.**

37. onChange client script runs on

Ans: **Change in the value of a particular field**

38. Links, buttons, context menu action belongs to

Ans: **UI action**

39 Which among the following can a UI policy accomplish?

Ans: **Making a field read-only**

40. Which among the following is true:-

Ans: **Moving an entry from Selected to Available slush bucket removes it from the form.**

41. How do you confirm an instance upgrade?

Ans: **System Logs->events->system.upgraded, use this event to trigger the System Upgraded notification**

42. How do you approve a catalog request?

43. What all modules can an ESS user see under in Service Catalog?

44. What are the variables that you can add when you create a catalog item?

Ans: Options contained the combinations of following fields:

Slush bucket, **multiple choices**, additional category, **single line text**, **multi-line text**, **choice list**, **checkbox**

45. What is the purpose of an Order Guide?

Ans: **An order guide gives customers an easy way to order multiple related items as a single request, It uses:**

- **A single initial screen, where the customer fills in some initial information.**
- **A set of selected catalog items based on conditions derived from the initial information.**

46. Which of the following can be performed by a system administrator?

Ans: **Change the maximum size of attachments and restrict the type of attachments** [I chose this option as this requires a modification in sys_properties, other options were

possible with non-admin roles]

47. What all are available in a knowledge homepage?

48. Which of the following are available in Service Catalog:-

Ans: Record Producer, Catalog Variables, Order Guides

49. Which of the following is true:-

- a. When moved from left to right slush bucket, ref fields become bold
- b. System tables cannot be deleted
- c. Deleted system tables will be created again during an instance upgrade

50. Choose the order of evaluation of ACLs

Ans: An ACL rule only grants a user access to an object if the user meets all of the permissions required by the matching ACL rules.

-The condition must evaluate to true.

-The script must evaluate to true or return an answer variable with the value of true.

-The user must have one of the roles in the required roles list.

-The other matching ACL rules for the object type must evaluate to true.

51. What is sys_id?

ans - unique identifier for each record in a table

52. ACL is applied on - s

- a. user
- b. groups
- c. applications/modules
- d. table and field in table

53. Choose correct statement -

ans - A column is a field and a row is a record

54. What is the one pause condition for incident SLA?

ans - awaiting <something>

55. What table is used to store SLAs?

ans - task_sla

56. How will you approve a catalog request?

- a. Right click request record in request list and click approve
- b. Right click task record in task list and click approve
- c. ...
- d. ...

ans - I chose a as only that made sense

57. What is one thing in workflows peculiar for catalog?

ans - You can define visibility of variables on task form through workflow when it is created

58. What is BSM MAP?

59. What does CMDB consists of?

Ans: A (CMDB) which consists of entities, called Configuration Items (CI), that are

part of your environment.

A CI may be:

- A physical entity, such as a computer or router
- A logical entity, such as an instance of a database
- Conceptual, such as a Requisition Service

60. How will you make service catalog workflow available?

Ans- define workflow, create workflow activities and publish

61. What is Coalesce used for in import sets

ans - It compares the uniqueness of data if not found, creates new record

62. What steps will u take to load data from spreadsheet?

ans - load data, create transform map, transform

63. As an end user, which modules of service catalog do you see?

ans - My requests, Requested Item

64. What does RITM stand for?

ans - Requested Item

65. for an incident form when saved

a. Additional comments get copied to work notes

b. work notes get copied to activity log

c. work notes get overwritten

66. Which one on homepage will access knowledge?

a. news

b. catalog item

c. report

67. Applications and modules are loaded based on

ans - Roles

68. Knowledge process consists of –

ans - document creation, approval and review from SMEs and publishing

69. Gauge is added to

ans - homepage

70. What is difference between Save & Insert action on form

Ans. Save saves the record & stays on form, while Insert creates a new record & redirects to list view.

71. If an admin wants to check the status of task from a service catalog request, what path he's expected to follow

Ans. REQ (number)>>RITM (number)>>TASK (number)

72. How the catalog variables can be arranged on a catalog item

Ans. By setting the appropriate value of field 'Order'.

73. What do you mean by SaaS?

Ans. Software as a Service

74. Service catalog displays?

Ans. catalog items, order guides and record producer

75. ACL evaluates on below....

Ans. **condition / script and roles**

76. How do you enhance Homepage performance in case of gauges?

77. Shortcut to approve a Service Request?

Ans. **My request or Email**

78. How do you modify the field behavior?

Ans. **Right click> Personalize > Dictionary**

79. What do you mean by Elevated Privileges?

Ans. **Session**

80. What things are tracked in customizations?

Ans. Customizations are tracked by update sets only for some objects, using one of the following methods:

The **update_synch** attribute on the table

Special handlers for changes that require updates to multiple tables

Manual unloading for homepages

Update sets cannot be used to transfer other system changes or data. In general, update sets capture configuration information but not task or process data. For example, update sets track service catalog item definitions and related configuration data like variables and variable choices. However, if you test the service catalog by placing orders, the orders (requests, items, catalog tasks) are not tracked by update sets.

81. Where are customizations stored?

Ans. Each update set is stored in the Update Set [sys_update_set] table, and the customizations that are associated with the update set (stored in the Customer Update [sys_update_xml] table) appear as a related list on the update set record.

82. KB articles are referred in which modules below?

Ans. Service Catalog, **News**, INC.

83. What changes out of below would be applied in case of a merge update set?

Ans. You can merge multiple update sets into one for easy transfer.

To merge update sets:

1. Navigate to **System Update Sets > Merge Update Sets**.
2. Use the slushbucket to select the update sets to merge.
3. Enter a name for the new update set. Updates are added to this set when the original sets are merged.

4. Click **Merge selected**.

- The new update set is created and changes from the original sets are moved to the new set. Only changes that are not merged into the new set remain in the original sets.
- If the same object is updated in both sets (for example, both update sets modify the Incident form), only the most recent change is moved to the merged update set. The other update remains in its original update set to provide a record of the changes that were not moved. You may want to validate that the correct changes were moved to the new set by [viewing the update set](#).

After merging and validating, it is a good idea to delete or empty the original update sets to avoid applying an older change by mistake. The system does not remove the updates that were not merged into the new set.

84. DB name for custom table?

Ans. **U_tbl**

85. How can you view reports on homepage?

Ans.

86. Which is parent table for INC, CHG, PRB?

Ans. **Task**

87. SLA, OLA and UC are configured in which module?

Ans. **SLM**

88. When high security plugin is enabled?

Ans. The Platform Security Settings - High plugin is active by default on all new Service Now instances. For instances in which the high security settings are active, observe the following cautions:

Integrations into Service Now tables fail unless access control lists (ACL) are defined for the tables being accessed and the appropriate roles are assigned.

The same ACL requirements apply for import sets that apply to integrations.

The Platform Security Settings - High plugin automatically activates the Contextual Security plugin if it is not already active. In addition, the Platform Security Settings - High plugin delivers the following settings and features in the context of increasing the security of your Service Now platform.

Features:

High Security Settings: Default property values to harden security on your platform by centralizing all critical security settings to one location for management and auditing.

Default Deny Property: A new security manager property controls the default security behavior for table access.

Security Administrator Role: A new role used to prevent modification of key security settings and resources. The Security Administrator role is not inherited by the **admin** role and must be explicitly assigned.

Access Control Lists: Prevents modification of sensitive and platform-level resources in prior versions.

Property Access Control: Enables the ability to set read and write roles to individual properties in order to prevent modification.

Elevated Privilege: Allows users to operate in the context of a normal user and elevate to higher security role when needed.

Transaction and system logs are read only.

89. Data inconsistency correction is done from automated?

Ans.

V. Plugin

VI. Configurations

VII. Workflow

VIII. None of these

90. Workflow editor and Service catalog differs in approval methodology?

Ans. True

91. If a split is added in a form, how many columns get created?

Ans. Two

92. Icon of reference?

Ans. icon ()

93. Application Navigation Search history is stored somewhere or not?

Ans. No

94. Upgrade of instance, which is true?

i) As an SN Admin, you will manually do it

ii) It happens once in a year at 8 pm

iii) Customizations are lost?

95. Data Dictionary is used for?

Ans. Database Structure

96. Import Sets characteristics

97. How to change Homepage Color?

Ans. CSS

98. ESS can access-

Ans. My Items, My requests, KB

99. ACL applies on?

Ans. Fields and tables

100. Contextual Security-Question on hierarchy

Ans. **Generic to specific**

5. What does Order guide refer to in Service Catalog?

→ Ans: **Bundled Request (An order guide gives customers an easy way to order multiple related items as a single request)**

6. Where BSM maps are stored? On which table?

→ **bsm_map2 table (Business Service Management map)**

7. Which field should be there in table that identifies that it should be captured in Update Sets?

→ Ans: **update_synch** attribute

8. Where is workflow versions captured?

Ans: **wf_workflow_version** table

9. If workflow is not published, only checked out will it be captured in update sets?

→ Ans: **No**, only published workflows are captured in update sets.

10. What does workflow timelines represent?

→ Ans: **Shows timestamps in graphical form for activities of workflow.**

11. When Business rules can be used in Knowledge base?

→ Scenario based: **To insert Knowledge Article or Knowledge Submission through Incident, problem or change as record is closed in these mgmt.**

12. If prefix of Incident needs to be changed, which table should I refer?

→ Ans: **Number Maintenance table [sys_number].**

13. Global Search option can be found in which part of UI?

→ Ans: **On Banner**

14. In which part of UI will you find help (link to wiki) option?

→ Ans: **On header bar in Banner**

15. What is security_admin role?

→ Ans: **It comes after enabling Hi security plugin. (Elevated privileges)**

16. If a user is not given filter_global or filter_admin role, what will be the impact?

→ **He can save the custom filter for himself only, neither for his group nor globally.**

17. Scenario when an Interceptor can be used?

→ Ans: **In change management case to provide different option for user in case of separate view and template**

18. What changes are not captured in update sets?

→ Ans: **New user/group records and modification to a CI record.**

19. Where will you find option to edit a list?

→ Ans: **List control**

20. Name the SLA scheduled jobs.

→ Ans: **SLA breached.**

21. ACL which rule will win to restrict access to short description field of incident?

→ Ans: **Incident. Short Description**

22. Book mark feature can be found in which UI version?

→ Ans: **UI 11 (June 11 release)**

23. What are the UI components of a homepage?

→ **Banner, Content pane and Application Navigator.**

24. What should be enabled to make a KB article accessible to everyone?

→ Ans: **It should be made public**

25. How will you define a Service catalog workflow?

→ Ans: **Define Workflow properties, Define Workflow activities, Publish it.**

26. What is SSO integration?

→ Ans: **Single sign on for multiple applications**

27. Where does Home page list and Impersonate Icon present?

→ Ans: **Present on banner**

28. Coalesce in import set?

→ Ans: **Reduce chances of Data Redundancy during import**

29. Delegate User

→ Ans: **Request on behalf**

30. Pause condition in SLA.

→ Defines conditions (using the Condition Builder) which, **if met, pauses the SLA's timer**. Once the conditions are no longer met, the SLA will resume. Pause conditions are not compatible with Relative Durations.

31. What all actions can be performed with inbound email?

→ Ans: **create or update a record**

32. Content of service catalog

→ **Catalog Items, Record Producers, Order Guides**

33. RITM stands for? –

→ Ans: **Requested Item**

34. Table for SLA task - **task_sla**

35. Table for SLA Definitions – **contract_sla**

36. How KB are organized? – **By Topics and Categories**

37. How applications appear? – **By Roles**

38.Content of banner in S-Now. –

→ Ans: **Global Search, Impersonation Icon, Update Set, Print, Logout, Home, Debug, Wiki help**

39.ACL applies on?- Ans: **Fields and tables**

40.ESS can access- Ans: **My Items, My requests, KB**

41.How to change Homepage Color? Ans: **CMS (Content Management System)**

42.Data Dictionary is used for?-Ans: **Database Structure**

43.Workflow editor and Service catalog differs in approval methodology? Ans: **True**

44.When high security plugin is enabled? **By Default**

45.SLA, OLA and UC are configured in which module? Ans: **Service Level Management**

46.Which is parent table for INC, CHG, PRB? Ans: **task**

47.How can you view reports on homepage? Ans: **Add to Homepage**

48.DB name for custom table? Ans: **u_tbl**

49.KB articles are referred in which modules below (Service Catalog, News, INC)? Ans: **News**

50.Where are customizations stored? Ans: **sys_update_xml [Customer Update] table**

51.What do you mean by Elevated Privileges?

→ **A role that has special permissions for the duration of the log in session**

52.How do you modify the field behavior? Ans: **Right click> Personalize > Dictionary.**

53.Shortcut to approve a Service Request? Ans: **Right Click -> State -> Approve**

54.How do you enhance Homepage performance in case of gauges?

→ Ans: **Off Refresh Button/Delete Gauges**

55.ACL evaluates on below.... Ans: **condition/script and roles**

56.If workflow checked out, can it be modified by any user? And: **Yes, using force checkout**

57.If a split is added in a form, how many columns get created?

58.What is represented by order in Service catalog? Ans: **how the catalog variable will be displayed.**

59.When High Security plugin is activated? Ans: **Penetration testing.**

60.How ACL is applied? Ans: **only on table and field level.**

61.Delegate Rules? Ans: **User who is being delegated should be of same department?(need to verify)**

62.What is a Column and row in a table? Ans: **Column is a field and row is a record.**

63.If User customizes the Homepage, what happens? Ans: **A prefix My is added to the homepage.**

64.What is true about Service catalog variables? Ans: **They are global.**

65.What is there stored in CMDB? Ans: **Measurable tangible and intangible data of a CI.**

66.How to set display value for any field. Ans: **By using dictionary**

67.Standard recommendation for Update set..? Ans : **Do not use default update set for customization**

68.Upgrade of instance, which is true?

69.Fastest method of approving requests

Options: i) As an SN Admin, you will manually do it

ii) It happens once in a year at 8 pm

iii) Customizations are lost?

70.Difference between Business Rules and Client Scripts?

71.Service Now update set multiple on incident form.

72.UI Action/UI Policy

73.**Application Navigation Search history is stored somewhere or not?**

74.Service Catalog workflow activities..? Ans: **Workflow properties, Workflow activities and publish**

75.Which customizations would get stored in update set?

→ Ans:

- **Any changes to scripting,**
- **new field's customization,**
- **Workflows**
- **Form sections**
- **Lists**
- **Related lists**
- **Choice lists**
- **Content pages (in Content Management)**
- **Database changes**
- **System dictionary entries**
- **Field labels**
- **UI actions**
- **UI policies**
- **business rules**
- **client script**

76.Order the typical no of users for any SNOW instance: Ans: **ESS, ITIL, Delegate Admin and Admin**

77.Catalog request flow: Ans: **Item Requests, RITM, Fulfillment, Procurement**

78.How to change background color? Ans: **Right Click -> Personalize -> All -> Style**

79.After save on form. Which fields get stored in activities log.? Ans: **Audited fields**

80.Home icon purpose on banner

81.In Service now which role is get option for approval a request or same etc. (Delegate)

82. What is the standard order for incident execution?
83. How do you define New Release and Preview Release?
84. After submit incident ticket what happens to Additional Comment data?
→ Ans: **Data stores to database and displays in activity log.**
85. In case of Client Script which field should be true to apply client script on all views.?
→ Ans: **Global field**
86. Role based (if a role has assign multiple roles then which option is true)
87. What is sys_id? Ans: **Unique Record Identifier (32-Character)**
88. Where is data stored? Ans: **Tables**
89. What is condition contains? Ans: **a field, an operator and a value**
90. What is the true if we delete the system table?
→ Ans: **Automatically recreated deleted System table in Next Upgrade**
91. How to make an UI Policy global? Ans: **By Check the Global field**
92. Button, Related Links and Context Menu these are? Ans: **UI Actions**
93. What is the true about Client Script and BR?
94. How ServiceNow system is configured to send an email notification after system Upgrade?
→ Ans: **Define in Notification Module**
95. What is the true about SluchBucket?
→ Ans: **Fields appearing in Selected section will be present in form**
96. ACL applies to? Ans: **Table or Field**
97. How ACL will execute? Ans: **generic to specific**
98. What is the use of an Order Guide? Ans: **To order multiple items in single Request**
99. Which module is used for create a new Catalog item? Ans: **Maintain items**
100. What are Service Catalog HomePage contains?
Ans: (Record producer, Order Guide and Catalog items)
101. How to arrange the Applications in left navigation to user?
Ans: (By giving role to user)
102. Which is true to create a catalog tasks
103. Ans: (Workflow for Sc_req_item)
104. Which module is used to see column structure in a table?
Ans: (Tables & Columns)
105. What is the use of BSM map? (Configuration item and its relationships)
106. How to define field attributes (Right click on field label > Personalize Dictionary)
107. What is SSO? (Type of integration used to login single time and access other application without relogin)
108. Which part of HomePage contains KB? (News)
109. What is the Processes of KB?()

110. What are the modules can be accessed by ESS in Service Catalog?(My Request and Requested items)
111. How ACL is evaluated?
→ **Given a row level rule on incident, and a field level rule on incident.number, access to the number field would be allowed only if both rules evaluated to true. Both rules must be met before an operation is allowed.**
112. What is diff between SAVE and Insert buttons?(Save button saves the changes and remains in same page, Insert button inserts new record)
113. When Submit button Appears in the form?(only for New Record)
114. What is listing in HomePage icon?(List of home pages)
115. How to change the Development and Production instance color?
116. How to see the current version of instance as an Admin?(System Diagnostic application >> Stats Module >> Build)
117. What are tables can be deleted?(Starts with u_)
118. What is CMDB contains?
119. What is the use of an Update Set?(To moving customization from one instance to other instance)
120. When user modifies HomePage,What will happen?(Creates new with "MY " prefix)
121. In which place admin can edit the HomePgae?(Add Content)
122. Which is true about INC table?(Incident table extends task table)
123. Which is the Parent table for INC,PRB and CNG?
124. Where is all SLAs are stored?(task_sla)
125. What is retroactive start in SLA?(Takes the SLA start time from Date/Time field)
126. What is true about OnChange() client script?(Runs when field value changes)
127. Which is true about UI Policy?(Used to make priority field readonly)
128. What is the use of Order field in Order Guide's variable?(arranges the variables in ascending order in the Order Guide form)
129. What is the use of Coalesce field in Update set?
130. Which is true about Update Set?(Same Transform Map can be used multiple times in Same Import set)
131. What is SaaS? Ans: **Software as a Service**
132. When UI Actions appears on the form? Ans: **when conditions gets satisfied**
133. Can we validate workflow before publish? Ans: **True**
134. Arrange the No. of users in any new instance of service now. 1= most , 2= Moderate, 3= Less , 4= very less.??
a) ESS> Delegate> ITIL> ADMIN
b) **ESS> ITIL> Delegate> ADMIN**

- c) ADMIN> Delegate> ITIL>ESS
- d) ADMIN>ESS> ITIL > Delegate

1. Incident, problem tables inherit which table.

Ans: Task table.

2. Give example of a one to many relationships

Ans: sys_user table referring to the assigned_to field in Task table

3. When you customize a homepage, SNC makes a copy of it and _____

Ans: adds the prefix "My" to the homepage name.

4. Which of the following is true?

Ans: When a user belongs to more than one group, each group provides him permissions.

5. _____ receives notification, meeting invites on behalf of another user.

Ans: Delegate

6. What is SSO?

Ans: Single- Sign-On

7. How do you edit/ create a workflow?

Ans: Graphical Workflow Editor

8. What is the purpose of a service catalog workflow?

Ans: to create workflows to drive request fulfillment. Workflows can generate and assign approvals, generate and assign tasks, or run scripts and sub flows.

9. What is the important factor to remember when a user is creating catalog variable?

Ans: Catalog Variables are global by default.

10. What is the purpose of an update set?

Ans: An update set is a group of customizations that can be moved from one instance to another.

11. How can you change the number prefix from "INC" to "IN" for incident table?

Ans: Number maintenance table

12. Which of the following is possible via an inbound action?

- A. schedule a job
- B. sends an email notification
- C. modifying existing records

13. Which setting allows the user to view knowledge articles without logging in?

- a. **ESS Role**
- b. Public Setting
- c. View All Setting
- d. View all Role

14. Which of the following defines a condition?

Ans: **Field, Operator, Value**

15. Which of the following is true regarding roles?

Ans: Roles can contain other roles. When user is assigned to a role, he will inherit the contained roles as well.

16. ACL is part of which security?

- a. Physical Security
- b. **Contextual Security**
- c. Compliance Security

17. Which is true regarding Knowledge Base?

Ans: In a Knowledge base, articles are grouped according to categories.

18. How can you view the dictionary for a field?

Ans: Right clicks on the field and click Personalize Dictionary.

19. Which among the following is true regarding ACLs?

Ans: If there are row and field ACLs, user has to satisfy both to have access to the field.

20. What is Data Dictionary?

Ans: It contains information about a field's data type, character limit, default value, dependency, and other attributes.

21. How do you know which release version of Service Now you are working on?

Ans: Go to System Diagnostics->Stats and check the Build name.

22. How do you change the color of the instance?

Ans: Using Navigation Menu under Content Management.

23. What does this icon do (provided impersonate key symbol)?

24. What does this icon do (provided the home symbol in the banner)

25. Which of the following is data saved to?

- a. Table
- b. Form
- c. List

26. When user creates a table "abc", how does service now name it?

Ans: u_abc

27. Which among the following is true regarding tables?

Ans: You can delete the tables starting with "u_" permanently.

28. Which of the following influences homepage performance

Ans: Set refresh time as a long one or set it "off".

29. If the system administrator wants to modify the homepage, which of the following links on the page indicates that this can be done

- a. Add Context
- b. Change Layout
- c. Make Gauge

30. What does the order field in service catalog do?

Ans: It displays the catalog item in the ascending order of this value.

31. Which of the following gets automatically captured in an update set:-

- a. Table, schedules, forms
- b. Table, forms, data
- c. Table, forms, homepages
- d. Tables, forms, views

32. What does the "coalesce" field do?

Ans: Coalescing on a field (or set of fields) means the field will be used as a unique key.

33. What details does a knowledge article hold?

34. What does a transform map do?

Ans: A transform map is a set of field maps that determine the relationships between fields in an import set and fields in an existing Service Now table (such as Incidents or Users).

35. How is the application Navigator (left nav) populated on load

Ans: It is populated based on the role of the logged in user.

36. Difference between client script and business rule

Ans: Client script runs at client side onLoad, onChange and onSubmit of the form, BR runs at server side before/after record is inserted, updated or deleted.

37. onChange client script runs on

Ans: Change in the value of a particular field

38. Links, buttons, context menu action belongs to

Ans: UI action

39 Which among the following can a UI policy accomplish?

Ans: Making a field read-only

40. Which among the following is true:-

Ans: Moving an entry from Selected to Available slush bucket removes it from the form.

41. How do you confirm an instance upgrade?

Ans: System Logs->events->system.upgraded, use this event to trigger the System Upgraded notification

42. How do you approve a catalog request?

43. What all modules can an ESS user see under in Service Catalog?

44. What are the variables that you can add when you create a catalog item?

Ans: Options contained the combinations of following fields:

Slush bucket, multiple choices, additional category, single line text, multi-line text, choice list, checkbox

45. What is the purpose of an Order Guide?

Ans: An order guide gives customers an easy way to order multiple related items as a single request, It uses:

- A single initial screen, where the customer fills in some initial information.
- A set of selected catalog items based on conditions derived from the initial information.

46. Which of the following can be performed by a system administrator?

Ans: Change the maximum size of attachments and restrict the type of attachments [I chose this option as this requires a modification in sys_properties, other options were possible with non-admin roles]

47. What all are available in a knowledge homepage?

General, application, policies, email, news

48. Which of the following are available in Service Catalog:-

Ans: Record Producer, Catalog Variables, Order Guides

49. Which of the following is true:-

- a. When moved from left to right slush bucket, ref fields become bold
- b. System tables cannot be deleted
- c. Deleted system tables will be created again during an instance upgrade
- d. [Don't remember this one, I chose b]

50. Choose the order of evaluation of ACLs

Ans: An ACL rule only grants a user access to an object if the user meets all of the permissions required by the matching ACL rules.

-The condition must evaluate to true.

-The script must evaluate to true or return an answer variable with the value of true.

-The user must have one of the roles in the required roles list.

-The other matching ACL rules for the object type must evaluate to true.

51. What is sys_id?

ans - unique identifier for each record in a table

52. ACL is applied on - s

- a. user
- b. groups
- c. applications/modules
- d. table and field in table

53. Choose correct statement -

ans - A column is a field and a row is a record

54. What is the one pause condition for incident SLA?

ans - awaiting <something>

55. What table is used to store SLAs?

ans - task_sla

56. How will you approve a catalog request?

- a. Right click request record in request list and click approve
- b. Right click task record in task list and click approve
- c. ...
- d. ...

ans - I chose a as only that made sense

57. What is one thing in workflows peculiar for catalog?

ans - You can define visibility of variables on task form through workflow when it is created

58. What is BSM MAP?

59. What does CMDB consists of?

60. How will you make service catalog workflow available?

Ans- I chose - define workflow, create workflow activities and publish

61. What is Coalesce used for in import sets

ans - It compares the uniqueness of data if not found, creates new record

62. What steps will u take to load data from spreadsheet?

ans - load data, create transform map, transform

63. As an end user which modules of service catalog do you see?

ans - My requests, Requested Item

64. What does RITM stand for?

ans - Requested Item

65. for an incident form when saved

- a. Additional comments get copied to work notes
- b. work notes get copied to activity log
- c. work notes get overwritten

I chose b

66. Which one on homepage will access knowledge?

- a. news
- b. catalog item
- c. report

ans - a

67. Applications and modules are loaded based on

ans - Roles

68. Knowledge process consists of –

ans - document creation, approval and review from SMEs and publishing

69. Gauge is added to

ans - homepage

70. What is difference between Save & Insert action on form

Ans. Save saves the record & stays on form, while Insert creates a new record & redirects to list view.

71. If an admin wants to check the status of task from a service catalog request, what path he's expected to follow

Ans. REQ (number)>>RITM (number)>>TASK (number)

72. How the catalog variables can be arranged on a catalog item

Ans. By setting the appropriate value of field 'Order'.

73. What do you mean by SaaS?

Ans. Software as a Service

74. Service catalog displays?

Ans. catalog items, order guides and record producer

75. ACL evaluates on below....

Ans. condition / script and roles

76. How do you enhance Homepage performance in case of gauges?

Ans. To diagnose problems and improve homepage performance, administrators can:

Turn on homepage debugging

Troubleshoot slow reports

Administrators can also tune homepage performance by configuring the properties described on the following pages:

Parallel homepage rendering

Homepage caching

77. Shortcut to approve a Service Request?

Ans. My request or Email

78. How do you modify the field behavior?

Ans. Right click> Personalize > Dictionary

79. What do you mean by Elevated Privileges?

Ans. Session

80. What things are tracked in customizations?

Ans. Customizations are tracked by update sets only for some objects, using one of the following methods:

The **update_synch** attribute on the table

Special handlers for changes that require updates to multiple tables

Manual unloading for homepages

Update sets cannot be used to transfer other system changes or data. In general, update sets capture configuration information but not task or process data. For example, update sets track service catalog item definitions and related configuration data like variables and variable choices. However, if you test the service catalog by placing orders, the orders (requests, items, catalog tasks) are not tracked by update sets.

81. Where are customizations stored?

Ans. Each update set is stored in the Update Set [sys_update_set] table, and the customizations that are associated with the update set (stored in the Customer Update [sys_update_xml] table) appear as a related list on the update set record.

82. KB articles are referred in which modules below?

Ans. Service Catalog, **News**, INC.

83. What changes out of below would be applied in case of a merge update set?

Ans. You can merge multiple update sets into one for easy transfer.

To merge update sets:

5. Navigate to **System Update Sets > Merge Update Sets**.

6. Use the slushbucket to select the update sets to merge.

7. Enter a name for the new update set. Updates are added to this set when the original sets are merged.

8. Click **Merge selected**.

- The new update set is created and changes from the original sets are moved to the new set. Only changes that are not merged into the new set remain in the original sets.
- If the same object is updated in both sets (for example, both update sets modify the Incident form), only the most recent change is moved to the merged update set. The other update remains in its original update set to provide a record of the changes that were not moved. You may want to validate that the correct changes were moved to the new set by [viewing the update set](#).

After merging and validating, it is a good idea to delete or empty the original update sets to avoid applying an older change by mistake. The system does not remove the updates that were not merged into the new set.

84. DB name for custom table?

Ans. U_tbl

85. How can you view reports on homepage?

Ans. Reports → view/run → open a report → add to homepage

86. Which is parent table for INC, CHG, PRB?

Ans. Task

87. SLA, OLA and UC are configured in which module?

Ans. SLM

88. When high security plugin is enabled?

Ans. The Platform Security Settings - High plugin is active by default on all new Service Now instances. For instances in which the high security settings are active, observe the following cautions:

Integrations into Service Now tables fail unless access control lists (ACL) are defined for the tables being accessed and the appropriate roles are assigned.

The same ACL requirements apply for import sets that apply to integrations.

The Platform Security Settings - High plugin automatically activates the Contextual Security plugin if it is not already active. In addition, the Platform Security Settings - High plugin delivers the following settings and features in the context of increasing the security of your Service Now platform.

Features:

High Security Settings: Default property values to harden security on your platform by centralizing all critical security settings to one location for management and auditing.

Default Deny Property: A new security manager property controls the default security behavior for table access.

Security Administrator Role: A new role used to prevent modification of key security settings and resources. The Security Administrator role is not inherited by the **admin** role and must be explicitly assigned.

Access Control Lists: Prevents modification of sensitive and platform-level resources in prior versions.

Property Access Control: Enables the ability to set read and write roles to individual properties in order to prevent modification.

Elevated Privilege: Allows users to operate in the context of a normal user and elevate to higher security role when needed.

Transaction and system logs are read only.

89. Data inconsistency correction is done from automated?

Ans.

IX. Plugin

- X. Configurations
- XI. Workflow
- XII. None of these

90. Workflow editor and Service catalog differs in approval methodology?

Ans. **True**

91. If a split is added in a form, how many columns get created?

Ans. **Two**

92. Icon of reference?

Ans. icon ()

93. Application Navigation Search history is stored somewhere or not?

Ans. **No**

94. Upgrade of instance, which is true?

- i) **As an SN Admin, you will manually do it**
- ii) It happens once in a year at 8 pm
- iii) Customizations are lost?

95. Data Dictionary is used for?

Ans. **Database Structure**

96. Import Sets characteristics

97. How to change Homepage Color?

Ans. **CSS**

98. ESS can access-

Ans. My Items, My requests, **KB**

99. ACL applies on?

Ans. **Fields and tables**

100. Contextual Security-Question on hierarchy

Ans. **Generic to specific**
